The Bachelor of Applied Science degree is an interdisciplinary program designed specifically for students who have completed an associate of applied science (AAS) degree and desire to further their education. The purpose of this degree is to provide AAS graduates the opportunity to expand their general education competencies and to enhance their technical coursework with related academic classes. This degree builds upon the knowledge a student already gained through the pursuit of the AAS while providing the education and critical thinking skills that open more career opportunities. All individual degree plans are approved by assigned advisors and a committee.

**DEGREE OPTIONS**

Bachelor of Applied Science 4+ years

**CAREER OPPORTUNITIES**

The Bachelor of Applied Science degree provides a curriculum for students who desire an education that can serve as a foundation for additional professional or graduate work in areas related to their associate degree.
