STUDENT SENATE
SESSION XLIV TERM II

IN THE SENATE
RESOLUTION 516
BY
ROBERT MIKLOS COLLEGE OF SCIENCE AND ENGINEERING
SPONSORED BY
KATE CHRISTIANES SCHOOL OF GRADUATE STUDIES
EMMA DOUPE COLLEGE OF ARTS AND LETTERS

The purpose of this resolution is to show support of the ASISU for making ISU a Bicycle Friendly University.

WHEREAS: ISU has established itself as a forward thinking university that places an emphasis on creating a healthy campus environment.

WHEREAS: The benefits of bicycling are far-reaching, including helping the environment by reducing carbon emissions, reducing transportation expenses, reducing vehicle congestion, optimizing space, improving health and enhancing campus quality of life.

WHEREAS: Non-motorized transportations also helps decrease the number of cars parking on campus and could increase crosswalk safety due to fewer vehicles being driven.

WHEREAS: Being a Bicycle Friendly University means to provide the necessary tools and infrastructure for safe and comfortable bicycling, while facilitating programs to encourage and support safe cycling. Steps to becoming bicycle friendly include adding bike lanes to roads, adding secure bicycle parking, creating smooth transitions at curbs and intersections, and smooth, maintained paths and sidewalks.

BE IT THEREFORE RESOLVED: That ASISU requests that steps toward becoming a Bicycle Friendly University be incorporated into the Campus Master Plan and that future changes to infrastructure be made to encourage and support healthy, non-motorized forms of transportation.
