DEPARTMENT OF PHYSICAL AND OCCUPATIONAL THERAPY
ACKNOWLEDGMENT OF RULES, REGULATIONS AND
PERMISSION FOR RELEASE OF INFORMATION

Student Name:_____________________________________________________

I, the undersigned, acknowledge that I have received a copy of the Student Handbook for the Master of Occupational Therapy Program, and that I have been informed of the departmental, college and university rules and regulations outlined and referred to therein. I agree to abide by these rules and regulations while I am enrolled as a student in the entry level program in occupational therapy at Idaho State University.

I further give permission to the faculty and chairperson of the department to release to any appropriate individual or entity the following information that could influence my practice as a student therapist including academic and performance information relating to the safety and protection of any patient, clinical instructor or site affiliating with the program.

I am aware that a copy of this form will be retained in my permanent file. I have received a copy of this form for my personal records.

The Department of Physical and Occupational Therapy at Idaho State University is an integral component of Idaho State University as a whole and of the School of Communication and Rehabilitation Sciences housed within the Division of Health Sciences. The programs currently offered through the Department are:

1. Professional entry programs leading to the Master of Occupational Therapy (MOT) and Doctor of Physical Therapy (DPT) degrees.

2. Some continuing education programs available with and without university continuing education credit. These programs do not lead to any academic degree or specialty certification at this time.

Idaho State University is accredited by the Northwest Association of Secondary and Higher Schools (last accreditation was in 2014).

The Occupational Therapy program was formed in 1997, with the first class of MOT students entering in the fall of 1998. The MOT was most recently reaccredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA) in April 2009. Accreditation was awarded for the maximum period of seven years because no areas of noncompliance were cited by ACOTE. ACOTE can be contacted at 4720 Montgomery Lane, Ste 200 Bethesda, MD 20814-3449 or by telephone at 301-652-6611 x2914.

Department Philosophy
The department philosophy is to conduct the educational programs in physical and occupational therapy as a cohesive attempt to mirror the professions in the post graduate clinical setting. Students in both physical and occupational therapy programs will be exposed to similar experiences in didactic and clinical courses. The concept of the rehabilitation team will be fostered through combined courses in the basic sciences, research, clinical affiliation experiences, and in the clinical management and professional communication courses. Communication between professions is crucial to the understanding of rationale behind treatment intervention and the planning strategies for excellence in client care in an ever-changing health care system. Students should be aware that the transition from formal training to the clinical employment setting in the professions should be a continuum of learning and exposure to the various arenas of client care and collegial interactions.

Description of the Occupational Therapy Program
The MOT Program is a graduate entry-level program awarding the degree of Master of Occupational Therapy (MOT). The program is designed to be completed in thirty-three months. Students complete seven full-time academic semesters. The learning process emphasizes student-directed attainment of learning objectives, with participation in lectures, labs, seminars, presentations, group and service learning projects, and clinical practice.
The Occupational Therapy Program is housed in the Department of Physical and Occupational Therapy within the School of Communication and Rehabilitation Sciences on the campus of Idaho State University. It is the only professional program offering entry-level occupational therapy training in Idaho. Occupational therapy facilities include teaching and research laboratories, faculty offices, student preparation areas, conference rooms, classrooms, clinical evaluation and treatment rooms, and clinical observation laboratories.

The program is designed to prepare professionals who have the ability to provide a full range of basic occupational therapy services including screening and referral, evaluation, and treatment. The program is designed to prepare graduates to work as generalists in occupational therapy. The program does not prepare the graduate as a specialist in any area, but provides the basis for developing specialization through clinical practice and further study. Graduates will be prepared to work as entry-level clinicians in all areas of occupational therapy and in all settings in which occupational therapy services are offered. Graduates are prepared to work as interdisciplinary team members with other health care providers including physical therapists, speech language pathologists, licensed clinical social workers, physicians, nurses, pharmacists and non-traditional health care providers. A major orientation of the program is preparation of practitioners to provide services in rural settings.

**Graduation Requirements**

Students receiving the MOT degree must satisfactorily complete all courses in the curriculum with a minimum of 3.0 GPA, prepare and present a professional project, demonstrate generic abilities at an emerging level, satisfactorily complete all Level I and Level II Fieldwork, complete a comprehensive written examination and pass an oral examination. Once the students have completed the degree requirements, they are eligible to sit for the National Board for Certification in Occupational Therapy (NBCOT) Certification Examination. After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). In addition, most states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination.

Please note that a felony conviction may affect a student’s ability to be placed for practicums and fieldwork rotations. Once graduated a felony conviction may affect their ability to sit for the NBCOT certification examination and/or attain state licensure.

Students are **required** to complete Level II Fieldwork within 12 months of completing the academic component of the program. Fieldwork sites are located throughout the state of Idaho and the United States. Due to the limited number of fieldwork sites in Pocatello, students should anticipate the financial impact of traveling and living out of town for the majority of their fieldwork.
SECTION II
INFORMATION ABOUT THE OCCUPATIONAL THERAPY PROGRAM

Occupational Therapy Program Mission
The mission of the Idaho State University Occupational Therapy Program is to prepare entry level clinicians competent to meet the diverse needs of people locally, nationally, and globally by upholding the standards of occupational therapy education. The program is committed to providing high quality student-centered interdisciplinary education, scholarship, lifelong learning opportunities, and respect for cultural diversity.

Occupational Therapy Program Philosophy
As part of Idaho State University, the program is committed to providing innovative education to a culturally diverse population of students. Therefore, we emphasize excellence in teaching, research, service, application of technology, and fostering inter-professional activities. We believe that communication between professions is crucial to understanding the rationale behind treatment intervention and the planning strategies for excellence in client care within an ever-changing healthcare system.

The occupational therapy program is committed to meeting the evolving and changing demands of healthcare environment. The program instills the meaning and use of occupation from the perspectives of science as well as personal experience. Students are educated to understand and value the powerful nature of a collaborative therapeutic relationship and its impact on occupational performance. They are prepared to be leaders in the occupational therapy profession and the healthcare field by facilitating and educating others on the significance of occupation-based practice as supported by evidence in diverse practice settings.

Faculty reflections on the current published philosophy:
Humans are active beings whose physical, emotional, cognitive, social, and spiritual development is influenced through occupation. Applying their capacity for intrinsic motivation, human beings engage in occupation to influence their health and their environment. Human life includes a process of continuous adaptation, which is a change in function that promotes survival and self-actualization. Biological, psychological, and environmental factors may interrupt the adaptation process at any time throughout the life cycle, potentially resulting in dysfunction.

Occupational therapy is founded on the belief that occupation, including its interpersonal and environmental components, is powerful. The therapeutic use of occupation can prevent and mediate dysfunction, as well as elicit maximum adaptation. Occupational therapy is a process that promotes personal growth, meaning and self-identity by engaging or re-engaging a person in productive, self-care, and leisure activities; by teaching the person new skills; by redesigning the activity; or changing the contextual environment.

Fundamental beliefs about humans:
We believe that people find meaning through occupation. Humans are infinitely diverse in their interests, abilities, and environments and they seek personal growth and health through the
means of performing their chosen occupations.

We believe that health is related to a continuum of occupational performance, from limited to optimal function. Humans strive for maximal occupational performance within all roles across their life span. Optimum performance is achieved through occupational adaptation in response to the uncertainties of life. Humans seek balance by complementing meaningful and goal-directed occupations with activities that support and enhance their daily life. Thus, occupations, within social and cultural contexts, become meaningful to humans.

Fundamental beliefs about how humans learn:
We believe that individuals have within themselves vast resources for personal growth, development and self-understanding. The role of the instructor, as well as that of the therapist, is to help one discover these resources, and to provide tools and encouragement in order to reach optimum performance. Individuals must reflect on their own occupations and identities to grow as therapists and people. The instructor and the therapist must trust the individual's capability to grow and reach his or her optimal occupational performance.

We believe that students benefit from collaboration and active participation in the educational process. This focus will enhance their ability to apply these same principles in client-centered practice.

We believe occupational therapy education must be global and diverse. It should include: an understanding of human behavior and development across the life span and cultures; science and knowledge of disease processes; theories, frames of references and concepts applicable to occupational therapy; and the therapeutic benefits of occupation. Students must be prepared to assume the role of assisting individuals to develop, maintain or restore their occupational performance.

We believe that students must understand the healthcare, political, cultural and social systems that impact service provision today and in the future. Students must be prepared to explore new arenas for occupational therapy service, to advance practice in rural areas, to educate the community and to collaborate with others in service provision to provide excellent, client-centered care. Interdisciplinary training of occupational therapy students, with a variety of professions, will facilitate this collaboration and a spirit of teamwork.

**Occupational Therapy Program Shared Vision**
We believe a shared faculty vision and open communication enables the coordination and mutual support of individual faculty and program goals which emphasize ongoing growth and enhancement in the areas of student education, clinical practice, and scholarship.

**Shared Faculty Tenets of the ISU Occupational Therapy Program Vision:**

I. Our program’s students, graduates, and faculty have well established reputations and are often recognized for their knowledge, skills, and contributions at local, regional, and national levels.

II. Our program’s students and faculty are engaged in mutually beneficial endeavors with institutional and community allies in support of the program and profession of occupational therapy.
III. Our program’s students benefit from a strong emphasis on the basic sciences supporting the development of a deep and rich understanding of the science of occupation in the promotion of meaningful life participation for all persons.

IV. Our program utilizes a dynamic and innovative curriculum fostering clinical skills in traditional and emerging areas of practice through integrating effective instructional technologies, strong hands-on experiences, and interdisciplinary collaboration.

V. Our program is the preferred occupational therapy program for Idaho residents and graduates from regional colleges and universities as evidenced in a consistently large pool of well-qualified applicants.

Occupational Therapy Program Curriculum Design
The curriculum of the Idaho State University Occupational Therapy Program is divided into the three domains of learning:

**Exploration of self and optimal occupational performance**
Foundational principles of evidence-based knowledge are provided throughout the curriculum and built upon within the program. This begins with an exploration into normal occupational performance and optimal functioning before delving into pathology. Students are given various opportunities to comprehend the importance of occupation in their own lives by way of hands-on experience and systematic examination of performance in areas of occupation, performance skills, performance patterns, context, activity demands and client factors. Furthermore students begin to recognize how occupation, or the lack of occupation, impacts health and well-being. Through reviews of evidence-based practice and observation in our onsite clinic, they learn how occupation is used in occupational therapy sessions as a catalyst for therapeutic benefits.

To better understand the relationship between normal occupational performance and the person, students take courses in the basic sciences including anatomy, physiology, kinesiology, and neuroscience. During this foundational year, students are also introduced to interdisciplinary education and practice by participating in classes with students in other health programs. Interdisciplinary education provides students with opportunities to compare and contrast the core values and roles of occupational therapy with other professions, thus fostering excellence in collaborative relationships.

**Examination of occupational performance deficits and therapeutic use of self**
During the second year of the occupational therapy curriculum, the educational emphasis shifts from exploration of normal occupation to understanding pathology and its impact on the continuum of occupational performance. Students investigate the tools and strategies used to enhance occupational performance, including frames of reference, task analysis, and therapeutic use of self. Evaluation and treatment techniques are taught with an emphasis on client-centered practice. Students apply knowledge in the second Level I clinical affiliation, hands-on laboratory exercises, practical examinations, and clinical practicum experiences designed to integrate knowledge into professional competencies. Students identify occupational problems, prescribe interventions and evaluate the outcomes. In addition, students continue to participate in interdisciplinary courses, begin professional projects, and identify service delivery models.
Application of knowledge in emerging practice areas including health promotion and environmental management

Idaho State University’s Occupational Therapy Program prepares students to expand their knowledge in the development and management of a variety of practice areas such as wellness and health promotion, environmental management, and rural health services. Occupational therapists need to be leaders in the ever-changing health care world. This requires occupational therapists to serve as program developers, administrators, and program coordinators in a variety of settings, including traditional, medical settings and non-traditional, community based practice. Economic, political, and social movements influence the expansion of community based service delivery systems, mandating that students be prepared to lead occupational therapy in new directions to ensure utilization of occupational therapy services.

Students learn how disability affects participation over the lifespan, integrating knowledge gained in the first two years of the curriculum about pathology and the continuum of occupational performance. Continued practicum experiences as well as Level I and Level II fieldwork experiences provide further opportunities to synthesize learning in a clinical environment and to closely collaborate with other health practitioners.

Main Themes of the Occupational Therapy Curriculum Design

Several fundamental themes related to the mission and philosophy of the Idaho State University Occupational Therapy program are imbedded throughout the curriculum. These key concepts influence each of the three domains, and application of the themes may be traced through individual courses in the curriculum. The main themes are as follows:

Occupation

Occupation is seen as a central construct in the theory and practice of occupational therapy. As such, students develop an appreciation for the complexity and centrality of occupation in the daily lives of the persons they will serve. Models and theories of occupation are embedded throughout the curriculum students explore the power and potential of occupation as a medium for maximizing occupational performance, health and well-being.

Diversity

Throughout all occupational therapy courses, students gain an appreciation for the broad diversity of culture, interests, roles, and abilities and opportunities prevalent in society and Southeast Idaho.

Rural health

Idaho and the surrounding states have considerable rural, underserved practice areas. Graduates of the program are likely to provide occupational therapy services in these rural settings. In addition, it is highly conceivable that graduates may be the only occupational therapy practitioner serving that area. With this in mind, students learn throughout the curriculum about the resources they will need to function autonomously, independently, and effectively, while still maintaining professional, ethical, and collaborative behaviors.

Interdisciplinary education and practice
Working closely with multiple health professionals instills in students a collaborative sense of teamwork that ultimately serves to improve client care. Interdisciplinary education provides an opportunity to appreciate the core values, philosophies, and treatment interventions unique to each discipline.

**Reflective Practice**
With growing emphasis on accountability and clinical competency, occupational therapy practitioners must reflect on their professional behavior and clinical skills in order to identify their strengths and weaknesses and create sound professional development plans. Throughout the curriculum students are required to assess their professional behavior using a portfolio based self-reflection process. Once students identify areas of weakness, they develop goals and desired outcomes for learning, and direct their learning through methods such as elective courses and extracurricular activities, rather than being dependent on the instructor for knowledge. Students learn to document their development in areas such as communication, problem-solving, time management, and critical thinking. Self-directed learning, in addition to the pedagogic content, results in competent clinicians committed to reflective practice and lifelong learning.

**Evidence-based Practice**
The Occupational Therapy program at Idaho State University encourages its students to embrace an evidence-based approach to the practice of occupational therapy. This approach to evidence-based practice considers research evidence together with clinical knowledge and reasoning to make judicious decisions about occupational therapy interventions. To foster clinical decision making based on best evidence, five factors should be considered Expectation, Environment, Experience, Ethics and Evidence. [Pollock, N. and Rochon, S. (2002) becoming and evidenced-based practitioner. In M. Law (ed.) Evidenced-Based Rehabilitation. Thorofare, NJ; Slack]. An expectation acknowledges a client-centered model of practice, thereby considering the wants and needs of clients. Further, theories and frames of reference relevant to occupational therapy practice aid in establishing these expectations. The physical and social environments are also considered as key factors in clinical practice which must be addressed within the process of occupational therapy service delivery. The experience a clinician gains over years of practice also asserts a significant influence on occupational therapy practice. By acknowledging the clinical and lived experiences of a reflective practitioner, both objective and more subjective criteria may be employed within clinical practice. Ethics will also play a role within clinical decision making; involving not only professional ethics but also the personal values the reflective practitioner. Finally, effective clinical practice will require that the therapist search out and evaluate the evidence which is most relevant to a particular case; evidence derived from either naturalistic or positivistic research perspectives are valued.

| **II. Educate and Train Students** | **II.a.** Educate and train students to engage in evidence-based decision-making in order to develop effective consumers of the scientific literature related to occupational therapy and other disciplines. |
| | **II.b.** The student will engage in evidence-based practice in the selection of interventions for his or her clients. |

| **III. Promote Awareness** | **III.a.** Promote awareness of the impact of psychosocial issues on the provision and outcomes of occupational therapy |
| | **III.b.** The student will address a client’s psychosocial needs regardless of practice setting. |

| **IV. Develop Reflective Practitioners** | **IV.a.** Develop reflective practitioners by fostering self-assessment skills related to professional development and a commitment to lifelong learning |
| | **IV.b.** The student will join the American Occupational Therapy Association and/or Idaho State Occupational Therapy Association |
| | **IV.c.** The graduate will demonstrate a commitment to lifelong learning. |

| **V. Promote Awareness of Unique Challenges** | **V.a.** Promote awareness of the unique challenges of occupational therapy practice and occupational participation in rural settings |
| | **V.b.** The student will complete a practicum or fieldwork placement in a rural-health setting. |

| **VI. Promote Diversity and Cultural Competence** | **VI.a.** Promote Diversity and cultural competence |
| | **VI.b.** The student will demonstrate cultural sensitivity when working with diverse populations. |
Schedules
Specific class schedules are published at the beginning of each semester. Students can anticipate the following time requirements:

- Academic time requirements: in-class time ranging from 20 to 40 hrs/week.
- Academic and clinical classes may occur during the day, evenings and weekends.
- Fieldwork time requirements: work time averaging 40 hrs/week which may include early morning, evening and/or weekend work assignments.

NOTE:
Hours for some classes vary, including practicum and professional project, so times are blocked in the schedule to ensure student availability.

2015-2016 Schedule

**Fall 2015**

August 23rd  1st, 2nd, and 3rd year students start classes

September 7th  Labor Day Holiday - No classes

November 23-27th  Fall Recess - No classes

December 8-19th  2nd year students start fieldwork (PTOT 5532)

December 7-18th  Generic Abilities Meetings (1st, 2nd, & 3rd Years)

14-18th  Finals - classes end for fall semester

**Spring and Summer 2016**

January 5th  3rd Years start Fieldwork (PTOT 5534)

11th  Classes Start

19th  Martin Luther King Holiday (no classes)

February 15th  Holiday - Presidents Day (no classes)

March 21-25th  Spring Break (no classes)

**NOTE:** Students should not make plans for unscheduled class time, because it will be used for scheduling for practicum, professional project, special speakers, fieldwork meetings and so on. There may be occasions in which courses, lectures, practicums and other instructional experiences may occur outside of scheduled class time, in the evenings and/or on weekends. Additionally, there will be lectures, laboratory experiences and practicums that occur off campus.

Student Services
In general, students may use all University services as on the Idaho State University website for current students: http://www.isu.edu/current.shtml

- Central Academic Advising - Responsible for freshmen, undecided and under-prepared students, and available to assist all students
- Student Success Center - Houses tutoring and the Math & English Labs.
- TRIO - A federally funded program assisting eligible students with advising, mentoring, tutoring & success strategies; eligible students must have an academic need, AND one of the (3) following requirements: first generation student, low income, or documented learning or physical disability
- Disability Services - Assists students, faculty, and staff with understanding and providing reasonable accommodations for those with documented learning physical, and/or emotional disabilities.
- Computer Center - Students can sign up for a computer account (Basement of the Business Administration Building #5)
- Eli M. Oboler Library - Provides students with a vast selection of books, periodicals & journals, as well as study rooms, online options.
- The Counseling & Testing Center - Offers personal counseling and administers national and local tests for placement and admission purposes.
- Career Center - Offers career counseling using assessments and tools such as the Myers Briggs Type Indicator (MBTI) & the Strong Interest Inventory, and FOCUS.
- Student Employment - Helps students find part-time jobs.
- Student Health Center - Provides free services to students who pay full-time fees and a minimal charge for spouses of students and part-time students (students are allowed to use the Student Health Center & Pharmacy whether or not they purchase ISU student health insurance).
- Baby U & ASISU Early Learning Center - Available for children ages 6 week to 6 years old for full-time or part-time, as well as drop-in care.
- Student Organizations - *Students who are involved in student organizations graduate at higher rates & build useful skills for résumé building and future employment.
- Study Abroad - Coordinated through the International Programs Office, students can attend a semester or two at a university in another country.

Specific services available through the Department of Physical and Occupational Therapy:
⇒ Academic student advisement
⇒ Information on clinical fieldwork sites
⇒ Announcements of potential employment or advanced education opportunities
⇒ Information on financial aid unique to health care service or occupational therapy students

Information on these services can be obtained by contacting the student’s advisor or the administrative assistant for the department.

Student Occupational Therapy Association
The recognized organization for student social and professional activities is the Idaho State University Student Occupational Therapy Association (SOTA). The Association operates under bylaws determined by the Association membership and approved by the Association of Students, Idaho State University (ASISU).

A copy of the ISU SOTA By-laws is located in Appendix K. The Program Director will appoint a faculty member as faculty advisor. All materials developed and activities planned by SOTA for public use/access must be approved by the Faculty Advisor and the Program Director prior to distribution.

**Financial Aid**

Students should contact the Department of Physical and Occupational Therapy for financial aid information and application forms specific to occupational therapy students. For general financial aid and scholarship information contact:

</tr>
</tbody>
</table>

Students are encouraged to contact sororities or fraternities and philanthropic or civic organizations such as Lions, American Business Men’s Clubs, Rotary and Elks in their hometowns for loans or scholarships.

Some hospitals and clinics offer scholarships or loans carrying the provision that the student will work in the facility upon graduation. Such arrangements are legally binding. Students should investigate all such contracts as they would any other contract for employment.

**Employment While a Student**

Due to the heavy class schedule and the occurrence of out-of-town clinical assignments students are not able to work full time while enrolled in the graduate entry level program. Part time work can be arranged but is strongly discouraged on the grounds that study time is at a minimum due to the class schedules.

Students should be particularly cautious about working in a occupational therapy setting. If they work as a volunteer or paid employee in such a setting they must be clearly identified as an occupational therapy aide. They may not be employed as an occupational therapist assistant (OTA) unless they are licensed as such in the state of Idaho. Students should be aware that legal complications may arise if they are providing health care services in any setting or at any time without being under the direct on-site supervision of a licensed occupational therapist.

- ISU professional liability insurance is included in tuition.
- *Additional costs of the program include: books/ learning materials, graduation fees, and fieldwork expenses. Fieldwork expenses vary depending on the location of the fieldwork. All fieldwork facilities require the student to carry health and liability insurance.

---

**SECTION IV**

**FIELDWORK**

**Clinical Fieldwork**

It is mandatory for all students to read the OT Program Fieldwork Manual. Please refer to the Fieldwork Manual for details about clinical experiences. Also, students should anticipate participating in all mandatory fieldwork meetings outside of scheduled classes. Students are responsible for all direct and indirect costs related to fieldwork rotations (transportation, housing, food, etc.).

**Fieldwork I:**

Each student will complete two full time (40hr/week) Level I fieldworks lasting two weeks in duration. The Fieldwork I experience allows the student to begin practicing the learned information and to participate in a portion of the occupational therapy process. Fieldwork I experiences may address both psychosocial issues in a community-based and institutional based evaluation and treatment setting. Refer to the Fieldwork Handbook for details.
**Fieldwork II:**
Each student will complete two full time (40 hr/week) Level II fieldworks lasting twelve weeks each. All students will be encouraged to complete one Level II emphasizing clinical management of orthopedic, neurological, multi-systems and associated psychosocial problems in acute care, outpatient or rehabilitation hospital, and one Level II emphasizing clinical management in a community-based setting, addressing interaction of psychosocial, educational or health deficits.

All students will be expected to experience practice in both large metropolitan and small rural settings. Clinical fieldwork sites are established throughout the U.S. so students should expect to travel out of Pocatello and potentially out of Idaho for the majority of their affiliation experiences. Students are responsible for making necessary arrangements for transportation and lodging at their own expense in order to be at assigned affiliations. Refer to the Fieldwork Handbook for details.
SECTION V
PROFESSIONAL PROJECT, ORAL DEFENSE, AND COMPREHENSIVE WRITTEN EXAMINATION

Introduction
The Department of Physical and Occupational Therapy, as a member of the Graduate School, requires all students graduating with a Master's of Occupational Therapy degree to complete a professional project, take a comprehensive written examination and to successfully pass a final oral defense/examination.

Professional Project Guidelines
The professional project (PTOT 6616) consists of individual or small group study of a problem in occupational therapy theory, client problem management, education or administration. The professional project begins in the fall semester of the second year, and continues until completion in the spring semester of the third year, for a total of 5 credits.

Faculty members initiate professional projects because they are already engaged in research and scholarly activity and have developed ideas related to investigating issues in clinical practice, education, administration, and basic/applied science related to occupational therapy. Students either choose or are assigned projects based on project and faculty availability and interest. Potential projects are identified in fall of the second year. Professional projects may be a research study, case study, or other scholarly activity as determined by faculty advisor.

Project Advisors:
All student projects in the department will have two assigned faculty members who will guide the professional project to completion.

- A primary advisor sponsors the professional project. A primary advisor is normally designated during the fall of each year for the second year students choosing projects.
- Secondary advisors are asked to serve by the primary advisors in line with their interest in the projects and workload in the department. Secondary faculty advisors for projects are determined on a project by project basis based upon the scope of the project and the availability of faculty. At a minimum, secondary faculty advisors will be assigned the semester prior to the student’s professional project oral defense.

Professional Project Format:
The format of the project will be dependent on the type of project completed, but will culminate in a publishable written document and professional presentation. A project that included the collection of data on subjects in a quantitative/qualitative study must include an introduction, review of literature and purpose, methods and materials, results, discussion and conclusions. Please keep in mind that you have already made headway on the first three sections of this project when a proposal has been developed for the Human Subjects Committee. If you have done a project that does not involve specific data collection, such as a video, your format must include an introduction, purpose, description of the project, the narrative of the project, and, of course, the final product. Some information on project preparation is provided in the PTOT 5514
Research Methodology course. Please confer with your advisor on the project for any specific guidelines he/she may want you to follow.

**Authorship:**
The faculty advisor maintains the principal investigator role and students will be given recognition as co-authors on any peer reviewed publications they contribute to. The established policy of the Department of Physical and Occupational Therapy for research projects/scholarly activities that are conducted under faculty research/scholarly activity/case study lines and submitted for publication will have the faculty advisor(s) as the primary author(s). Faculty members who serve as co-advisors on the same research will determine in a collegial fashion who should be cited as the first author on a manuscript or abstract submitted for publication or presentation. If there is a difference of opinion as to who should be first author, the principles must request a committee review at the departmental level as per departmental procedure. Student groups developing research projects/scholarly activities who publish their efforts will be seen as the co-authors and the advisor(s) will be listed as primary authors. However, student research projects/scholarly activities, which are not being actively revised for publication by student authors within a six-month period from completion, will be open to faculty publication at that time. Projects that fall into this timeline may be published by the faculty advisor(s) as the primary author(s) with the students serving as co-authors. This means that the faculty member takes the leading role in preparing the manuscript for publication. If the faculty advisor(s) chooses this option, he/she must inform the student authors in writing and communicate with them through the preparation phase of the manuscript for appropriate feedback. The department encourages all students to stay in close touch with faculty advisors after the completion of the project.

**Professional Project Artifacts:**
Students completing Professional Project topics/course are required to present their oral examination committee with the specific materials in completed form no later than two weeks prior to their oral examination date.

The following information, documents, and format are described below:

- Cover/title page
- Abstract (300 words)
- Table of contents

**Section 1 - Presentation**
- Finalized PowerPoint presentation with complete note sections which will include one slide w/notes per page.

**Section 2 - References**
- Full references represented in the presentation in a Microsoft word document.

**Section 3 - Appendix**
- Copy of the Human Subjects Application (if applicable)
- Copy of the Human Subjects Approval Letter (if applicable)
- Copy of measurement tools (assessments, surveys, questionnaires, etc.) (if applicable)
- Completed article manuscript (if applicable)
- Completed grant applications (if applicable)
Professional Presentation:
Upon completion of the professional project, students will individually present their project to their committees (Chair, 2nd, and graduate faculty member) as a part of the oral defense (fall or spring semester of their third year in the program) and present a poster at the MOT program research colloquium (spring semester of their third year). Students can decide if they want to present a poster as an individual or as a group (if that is how their project is assigned). The following are required for all students.
   i. students must have their projects in a completed form add approved by their project chair prior to schedule the oral exam with the committee and the graduate school.
   ii. presentations must be sent to committee members at least two weeks before the scheduled oral exam.
Although the specific organization and agenda of each student’s oral defense is under the direction of his or her committee chair, students should plan on the following general structure:
   i. professional project presentation/overview (30-35 minutes) and follow up discussion (up to 20 minutes). The poster is not required to be completed at this point of the professional project process.
   ii. Discussion of general occupational therapy topics and areas of deficiency from the comprehensive examination (up to 25 minutes).
Students should expect the following for the research colloquium:
   i. Open to all faculty and students within the School of Rehabilitation and Communication Sciences and other departments on campus, invited family and friends, clinicians within the area and others who might be interested.
   ii. Occurs On the morning/afternoon of the Graduation Dinner (which is typically the day prior to the commencement ceremony).
   iii. Participation:
      a. All faculty and students (2nd & 3rd year students) are required to attend.
         i. All 3rd year students are required to present and to attend all of their classmates’ presentations in order to receive a satisfactory grade for PTOT 6616 prior to graduation.
            1. Students will present a poster as an individual or in their small project groups.
            2. Professional Project posters will be displayed and presented at during the colloquium.
ii. All 2nd year students are required to attend in order to receive a satisfactory grade in PTOT 6616.

iii. All 1st year students are encouraged to attend and participate in order to prepare them for the expectations of the professional project process.

Grading of Projects:
All projects will be graded on a Pass/Non-pass basis and based upon the specific objectives and outcomes established by the professional project advisor. See individual syllabi for specific project objectives, grading and project expectations. In order to graduate students are required to complete a minimum of 5 credits for PTOT 6616.

Oral Defense Guidelines
Students enrolled in the Master of Occupational Therapy program are required to complete and successfully pass an in-depth oral defense related to their professional projects. The oral defense is meant to be not only comprehensive but also a culminating event defending the student’s preparedness to become a competent practitioner.

Students are expected to pass the oral defense on their first attempt. In extenuating circumstances, as judged by the Committee, a student may be given a second opportunity to sit for the oral exam during the subsequent semester (per Graduate School policy). A student failing the 2nd oral examination will be dismissed from the program and will not graduate since the academic standards set forth in the program have not been met. Students finding themselves in this situation may appeal through the formal process as set forth by the Department and the Graduate School. If the opportunity for another oral examination is granted to the student, it will be conducted during a subsequent semester for the second unsuccessful attempt.

Major Advisor (Chair) list:
Dr. Bryan Gee
Dr. Kelly Thompson
Dr. Ted Peterson
Prof. Kimberly Lloyd

Secondary Advisor list:
Dr. Alex Urfer
Dr. Jim Creelman
Dr. Nancy Devine
Dr. Cindy Seiger
Dr. Eydie Kendall
Dr. Kathy Alexander
Dr. Bryan Gee
Dr. Kelly Thompson
Dr. Theodore Peterson
The occupational therapy student should be prepared during the defense to address the following:

- Professional Project/Scholarly Activity
- Occupational Therapy Practice Framework
- Clinical Application of the Occupational Therapy Process
- Occupational therapy theory and frames of reference
- Any areas from the comprehensive written examination in which the student scored poorly

The oral defense format will conform to the established departmental and Graduate School guidelines. Oral defenses will take place beginning in the fall of the third year of study and be completed no later than two weeks prior to graduation in the spring semester of the third year. In both instances the student is required to submit a written document of publishable quality in order to meet the requirements of PTOT 6616 and graduation.

The Oral Defense Examination Committee:
The Oral Defense Examination Committee is made up of three people, including the professional project primary advisor (Committee Chair), the professional project secondary advisor, and a designated Graduate Faculty Representative (GFR). The GFR is a faculty member outside of the Department of Physical and Occupational Therapy and is present to ensure the examination process is fair. The GFR is usually chosen by the student and then recommended to the Graduate School by the student’s departmental committee. A list of past GFR’s used by the department is available from the office secretarial staff. Students should select a GFR based upon their expertise and its relationship to the professional project topic. For example, if your client has a psychological profile, someone on the committee must have expertise in that area in order to help you with the preparation.

If the student elects, he/she may have one professional guest attend the oral examination. The Dean of Graduate Studies and the committee must approve the guest prior to the oral examination.

Comprehensive Written Examination
The written examination consists of multiple choice questions covering the entire curriculum. The questions are divided by case areas including the OT Practice Framework, theory, frame of reference, ethics, and OT process. Case questions will include sensorimotor, cognitive and psychological components, environmental, and temporal aspects, performance areas, administration, and evaluation and treatment. Students will receive a study guide in the fall of the third year. The examination is not given a pass/non pass threshold but functions as an aid to guide students to their strengths and areas of concern related to the curriculum content and the occupational therapy process. Any areas in which the student scores poorly may be further addressed in the oral exam. The written examination must be completed prior to the oral defense examination. The written examination is usually scheduled for the third week in October of the third year.
SECTION VI
MATRICULATION, REGISTRATION, AND GRADUATION

Matriculation
Upon notification of acceptance to the graduate entry program in Occupational Therapy, applicants must respond within the time stated on the acceptance notice indicating their intent to accept or not accept a position in the entering class. Students in the ISU Bachelor of Science in Health Sciences Pre-OT accelerated concentration should refer to Section VII.

Registration
Pre-registration will be completed by computer or in person. Registration for all subsequent semesters will be completed using standard Idaho State University advance registration procedures.
Graduation
Within the first two weeks of the semester or summer session in which the student expects to complete work for the degree, an application for graduation must be filed and the diploma fee of $20.00 paid. If the student does not complete requirements during this semester or summer session, the application for a subsequent term must be renewed.

Requirements for Graduation:

Academic Program Work:
Requirements for Continued Academic Standing leading to Graduation
1. Satisfactory completion of all courses in the Graduate Entry Program curriculum including BIOS 5574, and BIOS 5586. Satisfactory completion involves:

   Academic Course Work:
   - Competency at the level of B in all PTOT courses as stated and defined in each course, and no less than a B in BIOS 5574 and BIOS 5586.
   - Students earning a grade of B- or below or a U (unsatisfactory) in any one program PTOT course or a GPA of below a 3.0 will be placed on academic probation with the requirement of raising the GPA to above a 3.0 by the following semester and maintaining it through the remainder of the program. Not meeting this guideline will be grounds for dismissal from the program.
   - Students earning a grade of below a C- in any one program course will be dismissed from the program.
   - A cumulative grade point average of B (3.0) or better in all graduate course work.

   Clinical Course Work:
   - Competency in entry-level clinical skills in occupational therapy as stated and defined in The Fieldwork Handbook, and the course syllabus for each clinical affiliation (PTOT 5531, 5532, 5533, & 5534) and practicum courses (PTOT 5518 & 5519). Clinical and practicum courses are graded on an S (satisfactory) or U (unsatisfactory) basis. Students earning a U grade in any clinical course must repeat the course prior to continuing in the program. This may mean sitting out of the program sequence for one year.

   Professional Projects:
   - PTOT 6616 Professional Project is graded on the S/U basis.
   - During the completion of the professional project sequence students may be assigned a grade of IP (in progress) at the end of the semester when the expected coursework may not have been completed. The IP grade will stand only until the end of the subsequent semester at which time students are expected to complete the needed coursework for continuation of the project. The entire PTOT 6616 credit load must be completed with a grade of S by the end of the spring semester of the year of graduation.

   Oral Defense and Written Examination:
   - Satisfactory completion of an oral defense and a written examination addressing the entry-level curriculum as a whole. An examining committee consisting of the following conducts the oral examination:
Two faculty members from the Department of Physical and Occupational Therapy, one whom will serve as committee chair.

One other graduate faculty member from any university department other than Physical and Occupational Therapy.

Once the student has completed the degree requirements, he or she is eligible to sit for the National Board of Certification for Occupational Therapy (NBCOT) Certification Examination.

National Board for Certification in Occupational Therapy, Inc. (NBCOT)
12 South Summit Avenue
Suite 100
Gaithersburg MD 20877
(301) 990-7979
Fax (301) 869-8492
www.nbcot.org
SECTION VII
BACHELOR OF SCIENCES IN HEALTH SCIENCES – PRE OT – ACCELERATED CONCENTRATION

Students who have gained early pre-professional entry into the Master of Occupational Therapy (MOT) program through the Bachelor of Science in Health Science – Pre OT – Accelerated Track (BSHS) must apply to the MOT program. With successful completion of the pre-professional year in the MOT program and the completion of the BSHS degree requirements, the student will receive a BSHS degree. The student will then apply to the MOT program and complete it over the next two years. Application to the MOT program occurs during the BSHS student’s senior year. Acceptance to the MOT program is not guaranteed.

- Applications for the MOT program must be received one month prior to the last day of the spring semester. Late applications will be considered on a case by case basis.

In order to apply and be accepted into the MOT program, the BSHS student must satisfy the following criteria:

- Complete the BSHS degree. The BSHS degree must be completed before the onset of classes in the summer semester of the first year of the MOT program.
- Apply to the graduate school. Refer to the Graduate Bulletin for details. Application materials for the Graduate School are included in the MOT program application packet.
- Have a minimum grade point average (GPA) of 3.0 over all upper division course work.
- Take the Graduate Record Examination (GRE) or the Miller Analogies Test (MAT) early in the senior year. The scores on the GRE must meet the following:
  - Total combined score of 295 for verbal and quantitative
  - Verbal must be at least 146.
  - A minimum of 4.0 on the analytical portion
  - The ISU Graduate School must receive GRE scores by the application deadline.
  - The ISU school code for the GRE is 4355.

  or

- Take the Miller Analogies Test (MAT)
  - Score of 390
  - The ISU Graduate School must receive MAT scores by the application deadline.
- Complete the following prerequisite course work with a GPA of 3.0 in each category:

</table>

- Complete volunteer or paid aide experience in occupational therapy.
Applicants must demonstrate knowledge and exposure to the occupational therapy profession.

- All of the required experience must be completed PRIOR to applying to the MOT program.
- All of the experiences must be completed under the direct supervision of a practicing occupational therapist or occupational therapy assistant and must have occurred within the last five years.
- Total Experience Hours:
  A minimum of 40 hours must be completed in at least one occupational therapy practice setting.
- Upon completion of experience at each facility, a letter should be obtained from the supervising OT/occupational therapy assistant. The letter should state the number of hours completed, the types of OT services observed, and should be signed and dated by the supervisor. The application to the MOT program will include an experience documentation form. The supervising occupational therapist/health care provider may fill this form out, or attach the letter described above to the form when submitting an application.

- Letters of Reference
  - Each applicant must submit three letters of reference with the application. The letters of reference must come from the following individuals:
    1) an OT or OTA supervising the observation hours, 2) an academic source, and 3) someone who can attest to the applicant’s character (e.g. clergy, employer, etc.).
    Please note: Letters of reference will not be accepted from relatives of the applicant.
  - Letters of reference from doctors, nurses, physical therapists, and other health care professionals will not be accepted in place of the letter required from an occupational therapist.
  - The MOT program application will include a form on which to obtain letters of reference. Letters must be included with the application.

As part of your Occupational Therapy program, you will be placed in several off-campus sites for clinical training. You will be required to successfully complete a series of immunizations, drug testing and a criminal background check prior to entering the program. Once the acceptance form is received you will be sent a list of these immunizations.

Conviction of a felony or other serious offense will likely result in denial of placement for the clinical assignment, and consequently affect your standing in the program.

If you have any questions about whether your criminal history, if any, will prevent or restrict your ability to obtain a license in this field, you should discuss this with the appropriate licensing agency or board.

It is strongly recommended that students begin the application process no later January of their senior year. This will ensure time to complete any volunteer work, solicit letters of reference, and take the GRE or MAT in a timely fashion.
BSHS Student Responsibilities
While in their pre-professional year, BSHS students are accountable for all the rules, responsibilities, and expectations of all students in the MOT program. This includes the expectation of portfolios and Generic Abilities. Please refer to those sections of the Handbook for further details. Grades lower than a B during the pre-professional year may prevent admission into the MOT program.

Professional Fees
While in participating in the coursework of their pre-professional year, BSHS students regularly consume materials and supplies, resources, space, staff, and faculty. Therefore, in line with the MOT students, BSHS students are required to pay professional fees to help offset costs incurred of their participation in their pre-professional year. The professional fee schedule may change based upon the discretion of the program, university or the Idaho State Board of Education. The current professional fee and tuition schedule may be found on page 20 of this handbook or online at http://www.isu.edu/dpot/ot/mot-cost.shtml.
SECTION VIII
RULES AND REGULATIONS FOR STUDENT BEHAVIOR

Students are expected at all times while enrolled in the Occupational Therapy Program to act in accordance with the ethical standards of practice as stated in the Code of Ethics and Ethical Standards of the American Occupational Therapy Association (Appendix A). Students must complete the code of ethics agreement form in order to proceed with all fieldwork rotations and practicum experiences.

Students are expected at all times while enrolled in the Master of Occupational Therapy Program to act in accordance with the legal codes of practice of occupational therapy as stated in the Idaho State Licensure Regulations for occupational therapy (Appendix B). When students are at a clinical affiliation site out of state they must act in accordance with the legal codes of practice of occupational therapy as stated in that state. Students are responsible to obtain and review the statutes and regulations of each state they may affiliate in.

Students are expected at all times while enrolled in the Department of Physical and Occupational Therapy to act in accordance with the Academic Dishonesty standards of the Division of Health Sciences (Appendix C).

Students are expected at all times while enrolled in the Department of Physical and Occupational Therapy to act in accordance with the Generic Abilities (Appendix D).

Students are expected to follow the rules and regulations of University student behavior as specified in the Student Conduct System located at http://www.isu.edu/current.shtml under University Requirements.

Rules and Regulations Specific to the Department of Physical and Occupational Therapy:

Academic Setting:

1. Students will follow the rules for class attendance, participation and completion of requirements stated in the course syllabus for each class. Students will notify the course instructor of anticipated absence from required activities or classes. In the event of emergency absence, notification will be made as soon after the absence as is reasonably possible.

3. Students will dress appropriately for class activities and for weather, with consideration of representing to the public a professional appearance. This means clothing that does not fully cover stomach, back, and/or chest is not allowed and students so attired may not be admitted to the class session.

4. As per departmental requirements, students will make arrangements to meet with their faculty advisors no less than one time each semester for the purposes of program planning, progress review, self-reflection and the development of semiannual self-improvement plans as a part of the professional behavior/generic abilities process.

5. Students are expected to use class time for an open discussion of concepts, opinions and information when discussion time is scheduled. Behavior that
represents a lack of respect for the views of faculty, guest lecturers or other students will be grounds for disciplinary action.

6. Students will carry malpractice liability insurance at all times while enrolled in the program beginning with the first fall semester.

7. Students will be screened annually for basic health status. The student is required to update immunizations for measles, mumps, rubella, and receive an annual TB test. All immunizations and health screens required by clinical facilities or practicum sites, will be the responsibility of the student.

8. Students will carry or otherwise be covered by general health insurance at all times while enrolled in the program. The insurance is the responsibility of the student.

9. Students will comply with criminal background check procedures as outlined in the OT Fieldwork Manual.

10. Students will uphold the standards found within the 2010 AOTA Code of Ethics at all times.

**Clinical Setting:**

1. Students will follow the rules of the facility for student/employee behavior, dress and attendance.

2. Students will notify the AFWC and the Fieldwork Educator or the Practicum Instructor of anticipated absence from the facility. In the event of emergency absence, notification will be made as soon after the absence as is reasonably possible. Absences from the facility are to be made up before completion of the clinical affiliation on a schedule arranged between the student and the Academic Fieldwork Coordinator and the Fieldwork Educator/Practicum Instructor.

3. Students will be responsible for arranging their own transportation, food, and lodging during the periods of clinical affiliation and the costs incurred during the affiliation.

4. Students are responsible for updating their address, phone number, and email address through their ISU portal, department secretary and AFWC. This includes temporary contact information while they are on fieldwork.

5. Students will abide by the Fieldwork Handbook for further rules and regulations related to fieldwork.

6. Students will uphold the standards found within the 2010 AOTA Code of Ethics at all times.

**Skills Commonly Required for Successful Completion of the Idaho State University Occupational Therapy Program**

Following the completion of the academic and clinical fieldwork experience the student will perform at the competency of an entry-level occupational therapist. The following skills are typically required for successful completion of both didactic and clinically oriented coursework within the occupational therapy program. On whole these skills are aspects within the following ISU courses required for matriculation: PTOT 4412, PTOT 5512, PTOT 4413, PTOT 5513, PTOT 5574, PTOT 5574L, BIOS 5586, BIOS 5586L,
Skills Commonly Required for Successful Completion of the Idaho State University Occupational Therapy Program

Motor and Praxis Skills:
- Squat, crawl, bend/stoop, reach above shoulder level, kneel, and climb stairs
- Lift and carry up to 50 pounds and exert up to 100 pounds of force for push/pull
- Move from room to room and maneuver in small spaces
- Maintain balance while standing, bending, and reaching
- Guard and assist others with ambulation
- Use hands repetitively; use manual dexterity
- Perform CPR for 3 minutes
- In a single day - sit 2-4 hours, stand 6-7 hours, travel 1-3 hours

Sensory Skills:
- See and respond to visual stimuli with acuity for distances ranging from 6 inches to 20 feet
- Hear and respond to auditory stimuli (fire alarm, cry for help, conversations, heart and lung sounds)
- Use tactile stimuli to discern shape, texture, pliability, weight

Cognitive Skills:
- Remain alert and awake for 90 minutes
- Follow verbal and written instructions
- Focus on a task for 90 minutes
- Divide attention between 2 or more things (keep track of time while interviewing a client)
- Self-direct focus back to task as needed
- Remember information
- Use sound judgment and safety precautions to prevent injury to self or others
- Recognize problems or errors
- Generate solutions to problems
- Anticipate problems
- Plan ahead
- Organize space and materials
- Prioritize tasks
- Self-evaluate performance
Emotional Regulation Skills:
- Maintain poise in stressful or emotional situations
- Demonstrate interest in peers, faculty, and clients
- Express emotions appropriately
- Change behavior in response to feedback

Communication/Interaction Skills:
- Communicate effectively through written and spoken English with others
- Adapt communication for intended audience
- Convey respect for others
- Interact and establish rapport with individuals and groups of people with diverse social, emotional, cultural, and intellectual backgrounds
- Work cooperatively with others
- Attend to non-verbal social cues

ACCOMMODATIONS OF STUDENTS WITH DOCUMENTED DISABILITIES IN FIELDWORK

Steps to establishing an effective learning environment for fieldwork education are outlined below. It is strongly encouraged that persons with a known disability adhere to this structure to maximize their success during fieldwork. Discovery of a direct threat to the safety of others may result in a delay or termination of a fieldwork experience. Direct threat means a significant risk to the health or safety of others that cannot be eliminated by a modification of policies, practices or procedures, or by the provision of auxiliary aids or services as provided in §35.139 of the US Title II regulations.

1) Student is advised of her/his right to disclose disability to ADA office and may subsequently request accommodations of OT program with ADA office consultation.
2) Student, OT program and ADA office may establish reasonable accommodations based upon the essential functions of the fieldwork site.
3) Student, or the AFWC with written student consent, discloses disability to and requests accommodations of Clinical Fieldwork (CF) site prior to placement.*
4) Student, AFWC, CF site, and ADA office negotiate reasonable accommodations based upon essential functions of the fieldwork site prior to placement.

* Placement refers to an agreement between the AFWC (ISU) and fieldwork site that the fieldwork site accept a student for an OT fieldwork education experience.
Dismissal:
The following are grounds for dismissal from the graduate entry-level program in Occupational Therapy:

⇒ The defined level of competency in the OT program is a grade of B. This includes all courses in the graduate OT program. A B- is permitted for BIOS 5574, and BIOS 5586.
⇒ Academic or clinical performance at less than the stated and defined level of competency for more than 6 credits/ or the maximum of more than 2 courses in the program.
⇒ Failure to pass the final oral case examination.
⇒ An annual cumulative grade point average of less than B (3.0) in all graduate course work.
⇒ Behavior which is not in accordance with any of the published regulations of the Department of Physical and Occupational Therapy or the University, or which does not meet the published ethical or legal standards or rules and regulations of the profession of occupational therapy. Such behavior must be documented. A decision to dismiss a student for cause of behavior requires a two-thirds majority vote of the faculty of the Department of Physical and Occupational Therapy.

The student will be notified in writing by certified mail, return receipt requested of dismissal within five (5) working days of the decision. A copy of the notice will be placed in the student's permanent file and will be copied to the Associate Dean, College of Health Professions and Dean of Graduate Studies. The notice will include:

- Date of dismissal
- Statement of cause for dismissal
- Notification of student's right to file for appeal of dismissal decision according to guidelines published in the Student Handbook of the Department of Physical and Occupational Therapy and in the Graduate Bulletin.

Students who are successful in dismissal appeals will be reviewed on a semester basis to ensure appropriate progression in meeting clinical and academic standards in the MOT program as outlined under the conditions of readmission. Readmitted students not meeting standards in one course will be dismissed from the program a second time with the due process of appeal.

Withdrawal:
A student may voluntarily withdraw from the graduate entry-level program in Occupational Therapy at any time. A student withdrawing from the program will notify the department in writing within five (5) working days of making the decision. The notice will be included in the student's permanent file. The notice will include:

- Date of withdrawal
- Statement of reason for withdrawal
A student who has withdrawn from the graduate entry-level program in Occupational Therapy may apply for readmission to the program during the next regular admission cycle following withdrawal. Applications for readmission will be considered by the admissions committee on an individual basis.

**Leave of Absence:**
A student may, for good cause, request a leave of absence from the program, such leave to last no longer than 12 consecutive months. A leave of absence request citing the reason for the request and starting date of the leave must be submitted to the Department Chairperson who will act on the request within ten working days. If a leave is granted, the student may return to the program without going through a readmission process. Students requesting a leave during a regular semester or summer session will withdraw from courses according to procedures specified in the University Bulletin. If the student does not register to continue course work in the normal sequence within one year of the start of the leave, the student will be dismissed from the MOT program.

The occupational therapy program is a three year “lock step” progressive program in curriculum and fieldwork affiliations. Students who are granted a leave of absence or are dismissed and then reinstated through the outlined appeals process must complete the program in no more than four years from the time of initial admission into the program. This ensures that the student will maintain a reasonable progression of training in occupational therapy and not be hindered in retaining both academic and clinical knowledge due to his or her absence from the program over an extended period of time.

Since the curriculum design is a “lock-step” model, any student must have the written approval of the AFWC and the program director to deviate from the general progression of the program in order to meet the Level I and II clinical fieldwork requirements. Only requests that do not significantly alter the course sequence and relationship between academic and fieldwork education will be considered. Students not meeting these requirements will not be eligible for graduation from the occupational therapy program.

**Appeal of a Grade:**
NOTE: The Graduate School Bulletin should be reviewed for the specific policies regarding appeals of grades and/or dismissal. Appeals forms can be found in Appendix E.

**Grievance Policies and Procedures**
Situations involving any type of discrimination or harassment of students by any member of the faculty or staff of the University should be pursued according to the grievance policies and procedures set forth in Appendix A of the Faculty/Staff Handbook. A copy of this Handbook is available in the department office at all times.

**OT Program Management of Student Complaints**
Policy: It is the policy of the ISU Occupational Therapy program that students bearing a complaint against faculty have their complaint addressed in a fair and direct manner. The intention of this policy is to assure consistent and reasonable resolution of student complaints.
Procedure: The management and redress of student complaints should proceed in a manner consistent with the organization of the Occupational Therapy program and its parent Department (Physical and Occupational Therapy). Specifically, a student should initially discuss and attempt to resolve the perceived cause for complaint with the faculty/staff with whom that student has issue. Should an amendable resolution not be achieved, then the student should address the complaint to her/his faculty advisor (verbally and in writing), who will serve a mediating role in incident investigation and resolution. Should an amendable resolution not be achieved through this process then the student should address her/his concern to the Occupational Therapy program Director in writing. The Occupational Therapy program Director will work with both the student and faculty/staff to resolve the issue in a fair and reasonable manner. Should an amendable resolution not be achieved, then the student should proceed with filing a formal grievance according to the policies and procedures set forth in Appendix A of the Faculty/Staff Handbook which can be found in the department’s administrative assistant’s office.
Department of Physical and Occupational Therapy building security procedures will follow those described in the Idaho State University Emergency Response Manual. Faculty and departmental offices and clinical areas are not accessible after hours or on weekends unless faculty members have been contacted as to the need for access. The labs will be open on a scheduled basis for specific functions being conducted for class or laboratory activity and research. When students are treating clients or conducting research, a faculty member must be on site for appropriate consultation and supervision. Only in extreme emergencies should students call security to gain access to laboratories during non-business hours.

**Clinical Equipment and Supplies**

In order to promote safety throughout the clinical procedures therapeutic equipment must be cleaned and maintained on a regular schedule. Clinical facilities, instructional, research spaces, supplies and equipment must be maintained to ensure an acceptable level of safety and quality for use as part of coursework, laboratories, routine clinical care and research activities.

A. Manufacturer recommended maintenance frequency is required for all equipment critical to patient health and safety.

B. Clinical equipment and supplies are to be cleaned on a routine basis in preparation to, during or after activities related to instruction, clinical care or research.

C. It is the responsibility of all faculty, staff, and students to know the proper cleaning of equipment and to comply with routine cleaning.

D. Faculty and students who check out equipment and supplies must ensure that it is returned both in the same working order, includes all its parts/items and has been thoroughly cleaned (appropriate for future client use).

E. Contact the director of the Physical and Occupational Therapy Associates and/or the program director with specific questions related the above.

**Specific Department Precautions for FIRE EMERGENCY:**

Fire Alarm Stations are located on both the east and west entrances of Garrison 2nd Floor.

Telephones are located in:

- Faculty and staff offices
- Teaching laboratory
- Hallway between Clinic Room 203 and 204 on 2nd floor Garrison Hall
Fire emergency procedures and building exit routes are posted by the telephone in:

- Departmental secretary’s office
- Occupational therapy dedicated laboratory area

Emergency telephone numbers are posted on (and programmed into) each telephone in offices:

ABC building extinguishers and fire hose are located in:

- Copy room
- West entrance Garrison 2nd Floor, across from Room 202 Clinic Reception area (ABC building extinguishers and fire hose)
- West entrance Garrison 3rd Floor, across from Room 301 Class Room area (ABC building extinguishers and fire hose)
- East hallway in Garrison 2nd Floor across from room 211
- East entrance Garrison 3rd Floor, across from Room 313 Class Room area (ABC building extinguishers and fire hose)
- Emergency exit routes for Garrison Hall, Building 63 are posted in the following areas:
  - Department office
  - Student Manual

Building security procedures are reviewed with department faculty, staff and students annually.

Unannounced building evacuation drills are held for Garrison Hall Building 63 from laboratory and office spaces no less than one time per year.

**Fire Emergency Directions:**

Emergency instructions for fire are posted by the telephones in each laboratory and in the departmental office. Students are expected to familiarize themselves with appropriate emergency procedures and building evacuation routes.

**Sample Emergency Directions**

**ROOM 215 ADL LABORATORY, BUILDING 63 2nd FLOOR GARRISON HALL**

**IN CASE OF FIRE**
Order evacuation of laboratory through WEST stair and building door  
(If these exits are blocked use EAST stair)

Call Fire Department 8-911 and give:
**STATE YOUR NAME:**
**LOCATION OF FIRE: Room 215, Building 63**

Call Campus Security 2514 and give:
**STATE YOUR NAME**
**LOCATION OF FIRE: Room 215, Building 63**

Send ONE person to activate building fire alarm on east or west entrance to 2nd Floor:
**IF ACCESSIBLE**

Use fire extinguisher or fire hose from hallway **IF FIRE APPEARS EASILY MANAGEABLE**
Medical Emergency
The Department of Physical and Occupation therapy medical emergency procedures will follow those described in the Idaho State University Emergency Response Manual.

Specific Department Precautions for MEDICAL EMERGENCY:

All faculty and students are certified annually in basic cardiac life support according to American Heart Association or Red Cross Standards.

Telephones are located in:
- Faculty and staff office
- Teaching laboratory
- Hallway between Clinic Room 203 and 204 on 2nd floor Garrison Hall

Medical emergency procedures are posted by the telephones in:
- Departmental secretarial office

Emergency telephone numbers are posted on (and programmed into) each telephone in offices.

Medical emergency procedures are on file in the departmental office and are included in the Student Manual.

Medical Emergency Directions

Minor Injury or Illness
- Apply first aid as appropriate
- If needed, transport person to:
  STUDENT: Student Health Service
  OTHER: Portneuf Medical Center Emergency Room

Serious Injury or Illness
- Apply first aid as appropriate
- Initiate CPR if appropriate
- If AMBULANCE is needed call 8 - 911 and give:
  STATE YOUR NAME
  YOUR LOCATION (__________________________)
- Nature of Illness or Injury
- Notify Campus Security 2514 and give:
  STATE YOUR NAME
  YOUR LOCATION (__________________________)
- Nature of Illness or Injury

Active Shooter on Campus
If you see an armed individual or a shooter on campus at any time, immediately call 911 and ISU Public Safety at 208-282-2515 with your location, if possible.
If you cannot get through by phone an have email or test capability, contact Public Safety through emergency@isu.edu providing our dispatcher with the following information:
Your name
Nature of the incident
Location of the incident
Description of person(s) involved
Number of persons who may be involved
If shots have been fired
Injuries to anyone, if known

IF THE SHOOTER IS OUTSIDE THE BUILDING

- If it is possible to flee the area safely and avoid danger, do so.
- Notify anyone you encounter to exit the area immediately.
- Evacuate to a safe area away from the danger and take protective cover. Stay there until assistance arrives.
- Dial 911 and call Public Safety at 282-2515 with your location, if possible.
- If instructed to lock down and stay inside, go to the nearest room, office or core area of the building if safe to do so.
- Lock and barricade doors and block windows.
- Close blinds and turn off all lights.
- Silence cell phones but continue to keep them on in order to receive emergency messages.
- Keep occupants calm, quiet and out of sight.
- Place signs in exterior windows to identify the location of injured persons, if safe to do so.
- Do Not Approach Emergency Responders - Let them come to you.
- Remain where you are until an “All Clear” by either the ISU Alerts notification system or an authorized known voice.
- If you do not recognize the voice that is giving instructions, do not change your status (stay put). Unknown or unfamiliar voices may be false and designed to give false assurances.

IF THE SHOOTER IS INSIDE THE BUILDING - REMEMBER THE FIVE OUTS

- **Figure Out** - what actions give you the best chance to survive.
- **Get Out** - If you can safely do so, get out and run to safety.
- **Call Out** - to 911 and Public Safety at 208-282-2515 and advise them of your room number and estimated number of people in the room.
- **Hide Out** - If you can’t get out, then find a place to hide. Lock the door if you can. Turn out lights and be silent. Put cell phones on silent. Don’t peek out - wait for the police, Public Safety, Building Coordinator or other first responder personnel.
- **Keep Out** - If the door can’t be locked, then barricade the door with whatever you can. If the door opens out, then use belts to tie the door to heavy objects, if possible.
- **Spread Out** - DO NOT huddle together. Remain calm and stay focused on survival. Develop a plan together on what you are going to do.
- **Take Out** - If the shooter enters your area, assume their intentions are lethal. Fight or do whatever it takes to survive...Your life depends on it.
- If you encounter police, keep your hands elevated with palms open and visible, and obey all police instructions.
DO NOT re-enter the area unless directed to do so by Public Safety or other first responder agencies.
Occupational Therapy Code of Ethics (2015)

Preamble

The 2015 *Occupational Therapy Code of Ethics* (Code) of the American Occupational Therapy Association (AOTA) is designed to reflect the dynamic nature of the profession, the evolving health care environment, and emerging technologies that can present potential ethical concerns in research, education, and practice. AOTA members are committed to promoting inclusion, participation, safety, and well-being for all recipients in various stages of life, health, and illness and to empowering all beneficiaries of service to meet their occupational needs. Recipients of services may be individuals, groups, families, organizations, communities, or populations (AOTA, 2014b).

The Code is an AOTA Official Document and a public statement tailored to address the most prevalent ethical concerns of the occupational therapy profession. It outlines Standards of Conduct the public can expect from those in the profession. It should be applied to all areas of occupational therapy and shared with relevant stakeholders to promote ethical conduct.

The Code serves two purposes:

1. It provides aspirational Core Values that guide members toward ethical courses of action in professional and volunteer roles, and

2. It delineates enforceable Principles and Standards of Conduct that apply to AOTA members.

Whereas the Code helps guide and define decision-making parameters, ethical action goes beyond rote compliance with these Principles and is a manifestation of moral character and mindful reflection. It is a commitment to benefit others, to virtuous practice of artistry and science, to genuinely good behaviors, and to noble acts of courage. Recognizing and resolving ethical issues is a systematic process that includes analysis of the complex dynamics of situations, weighing of consequences, making reasoned decisions, taking action, and reflecting on outcomes. Occupational therapy personnel, including students in occupational therapy programs, are expected to abide by the Principles and Standards of Conduct within this Code. Personnel roles include clinicians (e.g., direct service, consultation, administration); educators; researchers; entrepreneurs; business owners; and those in elected, appointed, or other professional volunteer service.

The process for addressing ethics violations by AOTA members (and associate members, where applicable) is outlined in the Code’s Enforcement Procedures (AOTA, 2014a).

Although the Code can be used in conjunction with licensure board regulations and laws that guide standards of practice, the Code is meant to be a free-standing document, guiding ethical dimensions of professional behavior, responsibility, practice, and decision making. This Code is not exhaustive; that is, the Principles and Standards of Conduct cannot address every possible situation. Therefore, before making complex ethical decisions that
require further expertise, occupational therapy personnel should seek out resources to assist in resolving ethical issues not addressed in this document. Resources can include, but are not limited to, ethics committees, Page 2 of 10 ethics officers, the AOTA Ethics Commission or Ethics Program Manager, or an ethics consultant.

Core Values

The profession is grounded in seven long-standing Core Values: (1) Altruism, (2) Equality, (3) Freedom, (4) Justice, (5) Dignity, (6) Truth, and (7) Prudence. Altruism involves demonstrating concern for the welfare of others. Equality refers to treating all people impartially and free of bias. Freedom and personal choice are paramount in a profession in which the values and desires of the client guide our interventions. Justice expresses a state in which diverse communities are inclusive; diverse communities are organized and structured such that all members can function, flourish, and live a satisfactory life. Occupational therapy personnel, by virtue of the specific nature of the practice of occupational therapy, have a vested interest in addressing unjust inequities that limit opportunities for participation in society (Braveman & Bass-Hagen, 2009).

Inherent in the practice of occupational therapy is the promotion and preservation of the individuality and Dignity of the client, by treating him or her with respect in all interactions. In all situations, occupational therapy personnel must provide accurate information in oral, written, and electronic forms (Truth). Occupational therapy personnel use their clinical and ethical reasoning skills, sound judgment, and reflection to make decisions in professional and volunteer roles (Prudence).

The seven Core Values provide a foundation to guide occupational therapy personnel in their interactions with others. Although the Core Values are not themselves enforceable standards, they should be considered when determining the most ethical course of action.

Principles and Standards of Conduct

The Principles and Standards of Conduct that are enforceable for professional behavior include (1) Beneficence, (2) Nonmaleficence, (3) Autonomy, (4) Justice, (5) Veracity, and (6) Fidelity. Reflection on the historical foundations of occupational therapy and related professions resulted in the inclusion of Principles that are consistently referenced as a guideline for ethical decision making.

Beneficence

Principle 1. Occupational therapy personnel shall demonstrate a concern for the well-being and safety of the recipients of their services.

Beneficence includes all forms of action intended to benefit other persons. The term beneficence connotes acts of mercy, kindness, and charity (Beauchamp & Childress, 2013). Beneficence requires taking action by helping others, in other words, by promoting good, by preventing harm, and by removing harm. Examples of beneficence include protecting and defending the rights of others, preventing harm from occurring to others, removing conditions that will cause harm to others, helping persons with disabilities, and rescuing persons in danger (Beauchamp & Childress, 2013).
Related Standards of Conduct

Occupational therapy personnel shall

A. Provide appropriate evaluation and a plan of intervention for recipients of occupational therapy services specific to their needs.

B. Reevaluate and reassess recipients of service in a timely manner to determine whether goals are being achieved and whether intervention plans should be revised.

C. Use, to the extent possible, evaluation, planning, intervention techniques, assessments, and therapeutic equipment that are evidence based, current, and within the recognized scope of occupational therapy practice.

D. Ensure that all duties delegated to other occupational therapy personnel are congruent with credentials, qualifications, experience, competency, and scope of practice with respect to service delivery, supervision, fieldwork education, and research.

E. Provide occupational therapy services, including education and training that are within each practitioner’s level of competence and scope of practice.

F. Take steps (e.g., continuing education, research, supervision, training) to ensure proficiency, use careful judgment, and weigh potential for harm when generally recognized standards do not exist in emerging technology or areas of practice.

G. Maintain competency by ongoing participation in education relevant to one’s practice area.

H. Terminate occupational therapy services in collaboration with the service recipient or responsible party when the services are no longer beneficial.

I. Refer to other providers when indicated by the needs of the client.

J. Conduct and disseminate research in accordance with currently accepted ethical guidelines and standards for the protection of research participants, including determination of potential risks and benefits.

Nonmaleficence

Principle 2. Occupational therapy personnel shall refrain from actions that cause harm.

*Nonmaleficence* “obligates us to abstain from causing harm to others” (Beauchamp & Childress, 2013, p. 150). The Principle of *Nonmaleficence* also includes an obligation to not impose risks of harm even if the potential risk is without malicious or harmful intent. This Principle often is examined under the context of due care. The standard of *due care* “requires that the goals pursued justify the risks that must be imposed to achieve those goals” (Beauchamp & Childress, 2013, p. 154). For example, in occupational therapy practice, this standard applies to situations in which the client might feel pain from a treatment intervention; however, the acute pain is justified by potential longitudinal, evidence-based benefits of the treatment.
Related Standards of Conduct

Occupational therapy personnel shall

A. Avoid inflicting harm or injury to recipients of occupational therapy services, students, research participants, or employees.

B. Avoid abandoning the service recipient by facilitating appropriate transitions when unable to provide services for any reason.

C. Recognize and take appropriate action to remedy personal problems and limitations that might cause harm to recipients of service, colleagues, students, research participants, or others.

D. Avoid any undue influences that may impair practice and compromise the ability to safely and competently provide occupational therapy services, education, or research.

E. Address impaired practice and when necessary report to the appropriate authorities.

F. Avoid dual relationships, conflicts of interest, and situations in which a practitioner, educator, student, researcher, or employer is unable to maintain clear professional boundaries or objectivity.

G. Avoid engaging in sexual activity with a recipient of service, including the client’s family or significant other, student, research participant, or employee, while a professional relationship exists.

H. Avoid compromising rights or well-being of others based on arbitrary directives (e.g., unrealistic productivity expectations, falsification of documentation, inaccurate coding) by exercising professional judgment and critical analysis.

I. Avoid exploiting any relationship established as an occupational therapy clinician, educator, or researcher to further one’s own physical, emotional, financial, political, or business interests at the expense of recipients of services, students, research participants, employees, or colleagues.

J. Avoid bartering for services when there is the potential for exploitation and conflict of interest.

Autonomy

Principle 3. Occupational therapy personnel shall respect the right of the individual to self-determination, privacy, confidentiality, and consent.

The Principle of Autonomy expresses the concept that practitioners have a duty to treat the client according to the client’s desires, within the bounds of accepted standards of care, and to protect the client’s confidential information. Often, respect for Autonomy is referred to as the self-determination principle. However, respecting a person’s autonomy goes beyond acknowledging an individual as a mere agent and also acknowledges a person’s right “to hold views, to make choices, and to take actions based on [his or her] values and beliefs” (Beauchamp & Childress, 2013, p. 106). Individuals have the right to make a determination regarding care decisions that directly affect their lives. In the event that a person lacks
decision-making capacity, his or her autonomy should be respected through involvement of an authorized agent or surrogate decision maker.

Related Standards of Conduct

Occupational therapy personnel shall

A. Respect and honor the expressed wishes of recipients of service.

B. Fully disclose the benefits, risks, and potential outcomes of any intervention; the personnel who will be providing the intervention; and any reasonable alternatives to the proposed intervention.

C. Obtain consent after disclosing appropriate information and answering any questions posed by the recipient of service or research participant to ensure voluntariness.

D. Establish a collaborative relationship with recipients of service and relevant stakeholders, to promote shared decision making.

E. Respect the client’s right to refuse occupational therapy services temporarily or permanently, even when that refusal has potential to result in poor outcomes.

F. Refrain from threatening, coercing, or deceiving clients to promote compliance with occupational therapy recommendations.

G. Respect a research participant’s right to withdraw from a research study without penalty.

H. Maintain the confidentiality of all verbal, written, electronic, augmentative, and nonverbal communications, in compliance with applicable laws, including all aspects of privacy laws and exceptions thereto (e.g., Health Insurance Portability and Accountability Act, Family Educational Rights and Privacy Act).

I. Display responsible conduct and discretion when engaging in social networking, including but not limited to refraining from posting protected health information.

J. Facilitate comprehension and address barriers to communication (e.g., aphasia; differences in language, literacy, culture) with the recipient of service (or responsible party), student, or research participant.

Justice

Principle 4. Occupational therapy personnel shall promote fairness and objectivity in the provision of occupational therapy services.

The Principle of Justice relates to the fair, equitable, and appropriate treatment of persons (Beauchamp & Childress, 2013). Occupational therapy personnel should relate in a respectful, fair, and impartial manner to individuals and groups with whom they interact. They should also respect the applicable laws and standards related to their area of practice. Justice requires the impartial consideration and consistent following of rules to generate unbiased decisions and promote fairness. As occupational therapy personnel, we work to
uphold a society in which all individuals have an equitable opportunity to achieve occupational engagement as an essential component of their life.

Related Standards of Conduct

Occupational therapy personnel shall

A. Respond to requests for occupational therapy services (e.g., a referral) in a timely manner as determined by law, regulation, or policy.

B. Assist those in need of occupational therapy services to secure access through available means.

C. Address barriers in access to occupational therapy services by offering or referring clients to financial aid, charity care, or pro bono services within the parameters of organizational policies.

D. Advocate for changes to systems and policies that are discriminatory or unfairly limit or prevent access to occupational therapy services.

E. Maintain awareness of current laws and AOTA policies and Official Documents that apply to the profession of occupational therapy.

F. Inform employers, employees, colleagues, students, and researchers of applicable policies, laws, and Official Documents.

G. Hold requisite credentials for the occupational therapy services they provide in academic, research, physical, or virtual work settings.

H. Provide appropriate supervision in accordance with AOTA Official Documents and relevant laws, regulations, policies, procedures, standards, and guidelines.

I. Obtain all necessary approvals prior to initiating research activities.

J. Refrain from accepting gifts that would unduly influence the therapeutic relationship or have the potential to blur professional boundaries, and adhere to employer policies when offered gifts.

K. Report to appropriate authorities any acts in practice, education, and research that are unethical or illegal.

L. Collaborate with employers to formulate policies and procedures in compliance with legal, regulatory, and ethical standards and work to resolve any conflicts or inconsistencies.

M. Bill and collect fees legally and justly in a manner that is fair, reasonable, and commensurate with services delivered.

N. Ensure compliance with relevant laws and promote transparency when participating in a business arrangement as owner, stockholder, partner, or employee.

O. Ensure that documentation for reimbursement purposes is done in accordance with applicable laws, guidelines, and regulations.
P. Refrain from participating in any action resulting in unauthorized access to educational content or exams (including but not limited to sharing test questions, unauthorized use of or access to content or codes, or selling access or authorization codes).

Veracity

**Principle 5. Occupational therapy personnel shall provide comprehensive, accurate, and objective information when representing the profession.**

Veracity is based on the virtues of truthfulness, candor, and honesty. The Principle of Veracity refers to comprehensive, accurate, and objective transmission of information and includes fostering understanding of such information (Beauchamp & Childress, 2013). Veracity is based on respect owed to others, including but not limited to recipients of service, colleagues, students, researchers, and research participants.

In communicating with others, occupational therapy personnel implicitly promise to be truthful and not deceptive. When entering into a therapeutic or research relationship, the recipient of service or research participant has a right to accurate information. In addition, transmission of information is incomplete without also ensuring that the recipient or participant understands the information provided.

Concepts of veracity must be carefully balanced with other potentially competing ethical principles, cultural beliefs, and organizational policies. Veracity ultimately is valued as a means to establish trust and strengthen professional relationships. Therefore, adherence to the Principle of Veracity also requires thoughtful analysis of how full disclosure of information may affect outcomes.

**Related Standards of Conduct**

**Occupational therapy personnel shall**

A. Represent credentials, qualifications, education, experience, training, roles, duties, competence, contributions, and findings accurately in all forms of communication.

B. Refrain from using or participating in the use of any form of communication that contains false, fraudulent, deceptive, misleading, or unfair statements or claims.

C. Record and report in an accurate and timely manner and in accordance with applicable regulations all information related to professional or academic documentation and activities.

D. Identify and fully disclose to all appropriate persons errors or adverse events that compromise the safety of service recipients.

E. Ensure that all marketing and advertising are truthful, accurate, and carefully presented to avoid misleading recipients of service, research participants, or the public.

F. Describe the type and duration of occupational therapy services accurately in professional contracts, including the duties and responsibilities of all involved parties.

G. Be honest, fair, accurate, respectful, and timely in gathering and reporting fact-based information regarding employee job performance and student performance.
H. Give credit and recognition when using the ideas and work of others in written, oral, or electronic media (i.e., do not plagiarize).

I. Provide students with access to accurate information regarding educational requirements and academic policies and procedures relative to the occupational therapy program or educational institution.

J. Maintain privacy and truthfulness when utilizing telecommunication in delivery of occupational therapy services.

**Fidelity**

**Principle 6. Occupational therapy personnel shall treat clients, colleagues, and other professionals with respect, fairness, discretion, and integrity.**

The Principle of *Fidelity* comes from the Latin root *fidelis*, meaning loyal. *Fidelity* refers to the duty one has to keep a commitment once it is made (Veatch, Haddad, & English, 2010). In the health professions, this commitment refers to promises made between a provider and a client or patient based on an expectation of loyalty, staying with the patient in a time of need, and compliance with a code of ethics. These promises can be implied or explicit. The duty to disclose information that is potentially meaningful in making decisions is one obligation of the moral contract between provider and client or patient (Veatch et al., 2010).

Whereas respecting Fidelity requires occupational therapy personnel to meet the client’s reasonable expectations, the Principle also addresses maintaining respectful collegial and organizational relationships (Purtilo & Doherty, 2011). Professional relationships are greatly influenced by the complexity of the environment in which occupational therapy personnel work. Practitioners, educators, and researchers alike must consistently balance their duties to service recipients, students, research participants, and other professionals as well as to organizations that may influence decision making and professional practice.

**Related Standards of Conduct**

**Occupational therapy personnel shall**

A. Preserve, respect, and safeguard private information about employees, colleagues, and students unless otherwise mandated or permitted by relevant laws.

B. Address incompetent, disruptive, unethical, illegal, or impaired practice that jeopardizes the safety or well-being of others and team effectiveness.

C. Avoid conflicts of interest or conflicts of commitment in employment, volunteer roles, or research.

D. Avoid using one’s position (employee or volunteer) or knowledge gained from that position in such a manner as to give rise to real or perceived conflict of interest among the person, the employer, other AOTA members, or other organizations.

E. Be diligent stewards of human, financial, and material resources of their employers, and refrain from exploiting these resources for personal gain.

F. Refrain from verbal, physical, emotional, or sexual harassment of peers or colleagues.
G. Refrain from communication that is derogatory, intimidating, or disrespectful and that unduly discourages others from participating in professional dialogue.

H. Promote collaborative actions and communication as a member of interprofessional teams to facilitate quality care and safety for clients.

I. Respect the practices, competencies, roles, and responsibilities of their own and other professions to promote a collaborative environment reflective of interprofessional teams.

J. Use conflict resolution and internal and alternative dispute resolution resources as needed to resolve organizational and interpersonal conflicts, as well as perceived institutional ethics violations.

K. Abide by policies, procedures, and protocols when serving or acting on behalf of a professional organization or employer to fully and accurately represent the organization's official and authorized positions.

L. Refrain from actions that reduce the public's trust in occupational therapy.

M. Self-identify when personal, cultural, or religious values preclude, or are anticipated to negatively affect, the professional relationship or provision of services, while adhering to organizational policies when requesting an exemption from service to an individual or group on the basis of conflict of conscience.

The AOTA *Occupational Therapy Code of Ethics* (2015) is a public statement of principles used to promote and maintain high standards of conduct within the profession and is supported by the *Core Values and Attitudes of Occupational Therapy Practice*. The AOTA *Occupational Therapy Code of Ethics* is an aspirational guide to professional conduct when ethical issues surface. Ethical decision making is a process that includes awareness regarding how the outcome will impact occupational therapy clients in all spheres. Applications of Code principles are considered situation-specific and where a conflict exists, occupational therapy personnel will pursue responsible efforts for resolution. The core ethical principles to which the ISU OT program faculty aspire are: beneficence, nonmaleficence, autonomy, confidentiality, duty, procedural justice, veracity and fidelity.

I have read, understand and agree to abide by The AOTA *Occupational Therapy Code of Ethics and Ethical Standards* (2015):

54-3722 SEVERABILITY.
“Association” means the Idaho occupational therapy association.

“Board” means the occupational therapy licensure board of Idaho as set out in section 54-3717, Idaho Code.

“Bureau” means the bureau of occupational licenses.

“Department” means the department of self-governing agencies.

“Good standing” means the individual’s license, certification, or registration is not currently suspended or revoked by any state regulatory entity.

“Graduate occupational therapist” means a person who holds a certificate of graduation from an approved occupational therapy curriculum, who has submitted a completed application for certification by examination, and who may practice occupational therapy in association with and under the supervision of an occupational therapist and under authority of a limited permit.

“Graduate occupational therapy assistant” means a person who holds a certificate of graduation from an approved occupational therapy assistant curriculum, who has submitted a completed application for licensure by examination and is performing the duties of occupational therapy assistant in association with and under the supervision of an occupational therapist and under the authority of a limited permit.

“License” means a document issued by the board to a person under this chapter authorizing the person to practice as an occupational therapist or occupational therapy assistant.

“Occupational therapist” means a person licensed to practice occupational therapy.

“Occupational therapy” means the care and services provided by or under the direction and supervision of an occupational therapist.

“Aide in the delivery of occupational therapy services” means a person who is not licensed by the board and who provides supportive services to occupational therapists and occupational therapy assistants. An aide shall function only under the guidance, responsibility and line of sight supervision of the licensed occupational therapist or an occupational therapy assistant who is appropriately supervised by an occupational therapist. The aide provides only specifically selected client related or nonclient related tasks for which the aide has been trained and has demonstrated competence.

“Occupational therapy assistant” means a person licensed to practice occupational therapy, and who works under the supervision of an occupational therapist.[1]

“Practice of occupational therapy” means the therapeutic use of everyday life activities (occupations) with individuals or groups for the purpose of participation in roles and situations in home, school, workplace, community, and other settings. Occupational therapy services are provided for the purpose of promoting health and wellness and to those who have or are at risk for developing an illness, injury, disease, disorder, condition, impairment, disability, activity limitation, or participation restriction. Occupational therapy addresses the physical, cognitive, psychosocial, sensory, and other aspects of performance in a variety of contexts to support engagement in everyday life activities that affect health, well-being and quality of life.

(a) Develop occupation based plans, methods or strategies selected to direct the process of interventions such as:

(i) Establishment, remediation, or restoration of a skill or ability that has not yet developed or is impaired.

(ii) Compensation, modification, or adaptation of activity or environment to enhance performance.

(iii) Maintenance and enhancement of capabilities without which performance in everyday life activities would decline.

(iv) Health promotion and wellness to enable or enhance performance in everyday life activities.

(v) Prevention of barriers to performance, including disability prevention.

(b) Evaluation of factors affecting a client’s occupational performance areas of activities of daily living (ADL), instrumental activities of daily living (IADL), rest and sleep, education, work, play, leisure, and social participation, including:

(i) Client factors, including body functions (such as neuromuscular, sensory, visual, perceptual, cognitive), values, beliefs, and spirituality, and body structures (such as cardiovascular, digestive, integumentary, genitourinary systems).

(ii) Performance patterns, including habits, routines, roles, and behavior patterns.

(iii) Contexts and activity demands that affect performance, including cultural, physical, environmental, social, virtual and temporal.

(iv) Performance skills, including sensory perceptual skills, motor and praxis skills, emotional regulation
skills, cognitive skills, communication and social skills.
(c) Interventions and procedures to promote or enhance safety and performance in activities of daily living (ADL), instrumental activities of daily living (IADL), education, work, play, leisure, and social participation, rest and sleep, including:
(i) Therapeutic use of occupations, exercises, and activities.
(ii) Training in self-care, self-management, home management, and community/work reintegration.
(iii) Development, remediation, or compensation of physical, cognitive, neuromuscular, sensory functions and behavioral skills.
(iv) Therapeutic use of self, including one’s personality, insights, perceptions, and judgments, as part of the therapeutic process.
(v) Education and training of individuals, including family members, caregivers, and others.
(vi) Care coordination, case management, and transition services.
(vii) Consultative services to groups, programs, organizations, or communities.
(viii) Modification of environments (home, work, school, or community) and adaptation of processes, including the application of ergonomic principles.
(ix) Assessment, design, fabrication, application, fitting, and training in assistive technology, adaptive devices, orthotic devices, and prosthetic devices.
(x) Assessment, recommendation, and training in techniques to enhance functional mobility, including wheelchair management.
(xi) Driver rehabilitation and community mobility.
(xii) Management of feeding, eating, and swallowing to enable eating and feeding performance.
(xiii) Application of superficial, thermal and mechanical physical agent modalities, and use of a range of specific therapeutic procedures (such as basic wound management; techniques to enhance sensory, perceptual, and cognitive processing; therapeutic exercise techniques to facilitate participation in occupations) to enhance performance skills.
(xiv) Use of specialized knowledge and skills as attained through continuing education and experience for the application of deep thermal and electrotherapeutic modalities, therapeutic procedures specific to occupational therapy and wound care management for treatment to enhance participation in occupations as defined by rules adopted by the board.
(d) Engaging in administration, consultation, testing, education and research as related to paragraphs (a), (b) and (c) of this subsection and further established in rule.

54-3703 LICENSE REQUIRED. It shall be unlawful for any person to practice or to offer to practice occupational therapy, or to represent such person to be an occupational therapist or occupational therapy assistant unless such person is licensed under the provisions of this chapter. Only an individual may be licensed under this chapter.

54-3704 EXEMPTIONS. Nothing in this chapter shall be construed as preventing or restricting the practice, services or activities or requiring licensure pursuant to this chapter of:
(1) Any person licensed or regulated by the state of Idaho from engaging in the profession or practice for which they are licensed or regulated, including, but not limited to, any athletic trainer, chiropractor, dentist, nurse, physician, podiatrist, physical therapist, optometrist, osteopath, surgeon or any other licensed or regulated practitioner of the healing arts, nor restrict employees working under the direct supervision of those persons referred to in this subsection (1), so long as such person does not hold himself or herself out as an occupational therapist, occupational therapy assistant or a person engaged in the practice of occupational therapy; or
(2) Any person employed as an occupational therapist or occupational therapy assistant by the government of the United States or any agency thereof, if such person provides occupational therapy solely under the direction or control of the organization by which such person is employed; or
(3) Any person pursuing a supervised course of study leading to a degree or certificate in occupational therapy in an accredited or approved educational program, if the person is designated by a title which clearly indicates a student or trainee status; or
(4) Any person fulfilling the supervised fieldwork experience requirements of section 54-3706, Idaho Code, if the experience constitutes a part of the experience necessary to meet the requirement of that
(5) Any person, for purposes of continuing education, consulting, and/or training, who is performing occupational therapy services in this state, for no more than sixty (60) days in a calendar year in association with an occupational therapist licensed under this chapter, if:
(a) The person is licensed as an occupational therapist or occupational therapy assistant in good standing in another state; or
(b) The person is certified as an occupational therapist registered (OTR) or a certified occupational therapy assistant (COTA) by the national board for certification of occupational therapy or a successor organization as established in rule.

54-3705. LIMITED PERMIT -- AND TEMPORARY LICENSE. (1) A limited permit may be granted to a graduate occupational therapist or a graduate occupational therapy assistant who has completed the education and experience requirements of this chapter for an occupational therapist or an occupational therapy assistant. The permit shall allow a person to practice occupational therapy under supervision as defined in section 54-3715, Idaho Code. This permit shall be valid until the person is issued a license under section 54-3710, Idaho Code, or until the results of the examination taken are available to the board. The board may renew a limited permit once.

(2) A temporary license may be issued by the board to an applicant who is currently licensed and in good standing to practice in another jurisdiction and meets the requirements for licensure by endorsement of the other jurisdiction while the application is being processed by the board.

54-3706. REQUIREMENTS FOR LICENSURE. A person applying for a license as an occupational therapist or as an occupational therapy assistant shall file a written application provided by the board showing to the satisfaction of the board that such person meets the following requirements:
(1) Education: Applicant shall present evidence satisfactory to the board of having successfully completed the academic requirements of an educational program in occupational therapy that is accredited by the American occupational therapy association’s accreditation council for occupational therapy education (ACOTE) or predecessor or a successor organization as established in rule and approved by the licensure board.
(2) Experience: Applicant shall submit to the licensure board evidence of having successfully completed a period of supervised fieldwork experience acceptable to the board, which period of fieldwork experience shall be:
(a) For an occupational therapist, a minimum of six (6) months of supervised fieldwork experience; or
(b) For an occupational therapy assistant, a minimum of four (4) months of supervised fieldwork experience.
(3) Examination: An applicant for licensure as an occupational therapist or as an occupational therapy assistant shall pass an examination as provided for in section 54-3708, Idaho Code.
(4) Is in good standing.

54-3707. APPLICATION FOR LICENSURE. Each applicant for licensure shall submit a completed written application to the board, on forms prescribed by the board, together with the application fee. The application shall be verified under oath and shall require the following information:
(1) A certificate of graduation from an approved occupational therapy curriculum, or an approved occupational therapy assistants curriculum accredited by the American occupational therapy association’s accreditation council for occupational therapy education, or predecessor or a successor organization as established in rule and approved by the licensure board.
(2) The disclosure of any criminal conviction or charges against the applicant other than minor traffic offenses;
(3) The disclosure of any disciplinary action against the applicant by any state professional regulatory agency or professional organization;
(4) A person trained as an occupational therapist outside of the United States and its territories shall satisfy the examination requirements as provided in section 54-3708, Idaho Code. The board shall require such applicants to meet examination eligibility requirements as established by the credentialing body recognized by the board and which are substantially equal to those found in section 54-3708, Idaho Code.
54-3708. EXAMINATION FOR LICENSURE OF OCCUPATIONAL THERAPISTS AND OCCUPATIONAL THERAPY ASSISTANTS. (1) Each applicant for licensure shall be examined by written examination to test the person's knowledge of the basic and clinical sciences relating to occupational therapy, occupational therapy techniques and methods, and such other subjects as the licensure board may require in rule to determine the applicant's fitness to practice. The written examination shall be the examination established and conducted by the national board for certification in occupational therapy and the passing score shall be the passing score established by the national board for certification in occupational therapy or its successor organization as established in rule.

(2) An applicant for licensure by examination who fails to pass the examination after two (2) attempts must submit a new application as set out in this chapter.

(3) An application upon which the applicant takes no further action will be held for no longer than one (1) year.

54-3709. WAIVER OF REQUIREMENTS -- LICENSE ENDORSEMENT. (1) The licensure board shall grant a license to any person certified prior to the effective date of this chapter and practicing in Idaho as an occupational therapist registered (OTR) or a certified occupational therapy assistant (COTA) by the national board for certification in occupational therapy or a predecessor organization as established in rule. The licensure board may waive the examination, education, or experience requirements and grant a license to any person certified by the national board for certification after the effective date of this chapter if the board determines the requirements for such certification are equivalent to the requirements for licensure in this chapter.

(2) The licensure board may waive the examination, education, or experience requirements and grant a license to any applicant who shall present proof of current licensure as an occupational therapist or occupational therapy assistant in another state, the District of Columbia, or territory of the United States which requires standards for licensure considered by the board to be equivalent to the requirements for licensure pursuant to this chapter.

54-3710. ISSUANCE OF LICENSE. The board shall issue a license to any person who meets the requirements of this chapter upon payment of the prescribed license fees.

54-3711. RENEWAL AND REINSTATEMENT OF LICENSE. (1) Any license issued under this chapter shall be subject to annual renewal and shall expire on the applicant's birthdate unless renewed before the applicant's birthdate in the manner prescribed by the rules of the board. The board shall require biennial proof of completing at least two (2) continuing education units recommended by the association and approved by the board. In addition, the board shall require ten (10) hours of professional development units as established in rule.

(2) The board may reinstate a license canceled for failure to renew upon compliance with requirements of the board for renewal of licenses.

(3) Upon application, the board shall grant inactive status to a licensee who (a) does not practice as an occupational therapist or an occupational therapy assistant, or (b) maintains any continuing competency requirements established by the board.

(4) An individual desiring reinstatement to full active licensure to practice as an occupational therapist or occupational therapy assistant shall submit a completed written application to the board according to procedures and requirements as promulgated by rule.

54-3712. FEES. The licensure board shall adopt rules establishing fees for the following:
(a) Initial license fee;
(b) Renewal of license fee;
(c) Inactive license fee;
(d) Limited permit and temporary license fee; and
(e) Reinstatement fee.

54-3713. SUSPENSION AND REVOCATION OF LICENSE -- REFUSAL TO RENEW. (1) Subject to the
provisions of chapter 52, title 67, Idaho Code, the board may deny a license or refuse to renew a license, or may suspend or revoke a license or may impose probationary conditions or disciplinary actions set out in section 54-3720, Idaho Code, if the licensee or applicant for license has been found guilty of unprofessional conduct as set forth in section 54-3718, Idaho Code, which has endangered or is likely to endanger the health, welfare, or safety of the public.

(2) A denial, refusal to renew, suspension, revocation, or imposition of probationary conditions upon a license may be ordered by the board after a hearing in the manner provided by chapter 52, title 67, Idaho Code. An application for reinstatement may be made to the board one (1) year from the date of the revocation of a license. The board shall (a) accept or reject an application for reinstatement; and (b) hold a hearing to consider such reinstatement.

(3) A suspended license is subject to expiration and may be renewed as provided in this chapter, but such renewal shall not entitle the licensee, while the license remains suspended and until it is reinstated, to engage in the licensed activity, or in any other conduct or activity in violation of the order of judgment by which the license was suspended.

(4) A license revoked on disciplinary grounds is subject to expiration as provided in this chapter, but it may not be renewed. The licensee, as a condition of reinstatement, shall meet license requirements for new licensees and shall pay a reinstatement fee set by the board.

54-3714. LICENSURE BOARD. (1) The occupational therapy licensure board of Idaho shall consist of five (5) members appointed by the governor, three (3) of whom shall be appointed from recommendations of licensees submitted by the association, except the first licensure board appointments whose members shall be registered occupational therapists (OTR's) or certified occupational therapy assistants (COTA's) eligible to become licensed under this chapter, all of whom shall be residents of Idaho at the time of their appointment. If recommendations are not made within sixty (60) days of notification and request, the governor may make appointments of any qualified individual. The persons appointed to the licensure board who are required to be licensed under this chapter shall have been engaged in rendering occupational therapy services to the public, teaching, or research in occupational therapy for at least five (5) years immediately preceding their appointments. At least three (3) licensure board members shall be occupational therapists and one (1) of those members may be an occupational therapy assistant. These members shall at all times be holders of valid licenses for the practice of occupational therapy in Idaho, except for the members of the first board, all of whom shall fulfill the requirements for licensure of this chapter. The remaining members shall be members of health professions or members of the public with an interest in the rights of the consumers of health services.

(2) The governor, within sixty (60) days following the effective date of this chapter, shall appoint two (2) licensure board members for a term of one (1) year; two (2) for a term of two (2) years; and one (1) for a term of three (3) years. Appointments made thereafter shall be for three (3) year terms, but no person shall be appointed to serve more than two (2) consecutive terms. Terms shall begin on the first day of the calendar year and end on the last day of the calendar year or until successors are appointed, except for the first appointed members who shall serve through the last calendar day of the year in which they are appointed, before commencing the terms prescribed in this section.

(3) Within thirty (30) days after the effective date of this chapter, and annually thereafter, the association may submit at least three (3) and not more than five (5) names for each of the five (5) board positions. In the event of a vacancy in one (1) of the positions the association may recommend, as soon as practical, at least two (2) and not more than three (3) persons to fill that vacancy. The governor shall appoint, as soon as practical, one (1) person, who shall fill the unexpired term. If the association does not provide a recommendation, the governor shall appoint a person to the unexpired term. The governor may remove any licensure board member for misconduct, incompetency, or neglect of duty after giving the board member a written statement of the charges and an opportunity to be heard thereon.

(4) The licensure board shall within sixty (60) days after the effective date of this chapter, and annually thereafter, hold a meeting and elect a chairman who shall preside at meetings of the licensure board. In the event the chairman is not present at any licensure board meeting, the licensure board may by majority vote of the members present appoint a temporary chairman. A majority of the members of the licensure board shall constitute a quorum. Other meetings may be convened at the call of the chairman or the written request of any two (2) licensure board members.
(5) Each member of the licensure board shall be compensated as provided in section 59-509(h), Idaho Code.

54-3715. SUPERVISION. Within the scope of occupational therapy practice, supervision is aimed at ensuring the safe and effective delivery of occupational therapy services and fostering professional competence and development. Practices and procedures governing the supervision of occupational therapy assistants, a limited permit holder and an aide in the delivery of occupational therapy services shall be established in rule and be adopted by the board. Practices and procedures shall include, but not be limited to, delivery of occupational therapy services, facilitation of growth and competence, frequency, methods and content of supervision, a plan of supervision and required documentation of compliance with the plan.

54-3716. COMPLAINTS. (1) Any person may file a complaint with the board against any licensed occupational therapist or licensed occupational therapy assistant in the state charging that person with having violated the provisions of this chapter.
(2) The complaint shall specify charges in sufficient detail so as to disclose to the accused fully and completely the alleged acts of misconduct for which he or she is charged.
(3) Upon receiving a complaint, the board shall notify the licensee of the complaint and request a written response from the licensee.
(4) The board shall keep an information file about each complaint filed with the board. The information in each complaint file shall contain complete, current and accurate information including, but not limited to:
   (a) All persons contacted in relation to the complaint;
   (b) A summary of findings made at each step of the complaint process;
   (c) An explanation of the legal basis and reason for a complaint that is dismissed; and
   (d) Other relevant information.

54-3717. OCCUPATIONAL THERAPY LICENSURE BOARD OF IDAHO -- POWERS AND DUTIES. (1) The licensure board shall administer, coordinate, and enforce the provisions of this chapter, evaluate the qualifications, and approve the examinations for licensure under this chapter, and may issue subpoenas, examine witnesses, and administer oaths, and may investigate practices which are alleged to violate the provisions of this chapter.
(2) The licensure board shall adopt rules and regulations, pursuant to chapter 52, title 67, Idaho Code, relating to professional conduct to carry out the policy of this chapter including, but not limited to, regulations relating to professional licensure and to the establishment of ethical standards of practice, disciplinary proceedings, license suspension proceedings, or license revocation proceedings for persons holding a license to practice occupational therapy in this state.
(3) The licensure board shall hold meetings, conduct hearings and keep records and minutes as are necessary to carry out its functions.
(4) Authorize, by written agreement, the bureau of occupational licenses to act as its agents in its interests as set out in the written agreement.
(5) Communicate disciplinary actions to relevant state and federal authorities, the national board for certification in occupational therapy (NBCOT), the American occupational therapy association (AOTA) and to other state occupational licensing authorities.

54-3718. GROUNDS FOR UNPROFESSIONAL CONDUCT. The board may take disciplinary action against a licensee for unprofessional conduct including:
(1) Obtaining a license by means of fraud, misrepresentation, or concealment of material facts;
(2) Being guilty of unprofessional conduct as defined by the rules established by the board, or violating the code of ethics adopted and published by the board;
(3) Being convicted of a crime in any court except for minor offenses;
(4) Violating any lawful order, rule or regulation rendered or adopted by the board;
(5) Violating any provision of this chapter or rules promulgated pursuant to this chapter;
(6) Practicing beyond the scope of the practice of occupational therapy;
(7) Providing substandard care as an occupational therapist due to a deliberate or negligent act or failure
(8) Providing substandard care as an occupational therapy assistant, including exceeding the authority to perform components of intervention selected and delegated by the supervising occupational therapist regardless of whether actual injury to the client is established;

(9) Failing to provide appropriate supervision to an occupational therapy assistant or aide in accordance with this chapter and board rules;

(10) Practicing as an occupational therapist or occupational therapy assistant when competent services to recipients may not be provided due to the therapist's own physical or mental impairment;

(11) Having an occupational therapist or occupational therapy assistant license revoked or suspended, other disciplinary action taken, or an application for licensure refused, revoked or suspended by the proper authorities of another state, territory or country, irrespective of intervening appeals and stays;

(12) Engaging in sexual misconduct. For the purposes of this subsection, sexual misconduct includes:
   (a) Engaging in or soliciting sexual relationships, whether consensual or non-consensual, while an occupational therapist or occupational therapy assistant/client relationship exists with that person;
   (b) Making sexual advances, requesting sexual favors or engaging in physical contact of a sexual nature with a client or clients;

(13) Aiding or abetting a person who is not licensed as an occupational therapist or occupational therapy assistant in this state and who directly or indirectly performs activities requiring a license;

(14) Abandoning or neglecting a client or clients under and in need of immediate professional care, without making reasonable arrangements for the continuation of such care.

54-3719.DISPOSITION OF RECEIPTS -- EXPENSES. (1) All fees received under the provisions of this chapter shall be deposited in the state treasury to the credit of the occupational therapy licensure fund and all costs and expenses incurred by the licensure board under the provisions of this chapter shall be a charge against and paid from said fund for such purposes, and the funds collected hereunder shall be immediately available for the administration of this chapter. In no instance shall the occupational therapy licensure fund be obligated to pay any claims which in aggregate with claims already allowed exceed the income to the occupational therapy licensure fund which has been derived from the application of this chapter.

(2) Money paid into the occupational therapy licensure fund pursuant to this chapter is hereby continuously appropriated to the licensure board for expenditure in the manner prescribed herein to defray the expenses of the licensure board in carrying out and enforcing the provisions of this chapter.

54-3720.PENALTIES AND DISCIPLINARY ACTIONS. (1) Any person who violates any provision of this chapter shall, upon conviction, be guilty of a misdemeanor.

(2) In addition to the penalties provided for in subsection (1) of this section, the board may impose separately, or in combination, any of the following disciplinary actions on a licensee as provided in this chapter:
   (a) Refuse to issue or renew a license;
   (b) Suspend or revoke a license;
   (c) Impose probationary conditions;
   (d) Issue a letter of reprimand or concern;
   (e) Require restitution of fees;
   (f) Imose a fine as provided for by rule which deprives the licensee of any economic advantage gained by the violation and which reimburses the board for costs of the investigation and proceeding;
   (g) Impose practice and/or supervision requirements;
   (h) Require licensees to participate in continuing competence activities specified by the board;
   (i) Accept a voluntary surrendering of license; or
   (j) Take other appropriate corrective actions, including advising other parties, as needed, to protect their legitimate interests and to protect the public.

(3) If the board imposes suspension or revocation of license, application may be made to the board for reinstatement, subject to the limits of this chapter. The board shall have discretion to accept or reject an application for reinstatement and may require an examination or other satisfactory proof of eligibility for reinstatement.
If a licensee is placed on probation, the board may require the license holder to:
(a) Report regularly to the board on matters that are the basis of probation;
(b) Limit practice to the areas prescribed by the board;
(c) Continue to review continuing competence activities until the license holder attains a degree of skill satisfactory to the board in those areas that are the basis of the probation; or
(d) Provide other relevant information to the board.

The board is empowered to apply for relief by injunction, without bond, to restrain any person, partnership, or corporation from any threatened or actual act or practice, which constitutes an offense under the provisions of this chapter. It shall not be necessary for the board to allege and prove that there is no adequate remedy at law in order to obtain the relief requested. The members of the board shall not be individually liable for applying for such relief.
(b) If a person other than a licensed occupational therapist or occupational therapy assistant threatens to engage in or has engaged in any act or practice which constitutes an offense under the provisions of this chapter, a district court of any county on application of the board may issue an injunction or other appropriate order restraining such conduct.

54-3721.OCCUPATIONAL THERAPY LICENSURE FUND. All fees collected under the provisions of this chapter shall be deposited in the state treasury to the credit of a separate fund to be known as the state occupational therapy licensure fund. All moneys received by said fund are hereby appropriated to the occupational therapy licensure board of Idaho for carrying out the purposes and objectives of this chapter, and to pay all costs and expenses incurred in connection therewith. Moneys shall be paid from the fund upon warrants drawn by the state controller upon presentation of proper vouchers approved by the board.

54-3722.SEVERABILITY. The provisions of this chapter are hereby declared to be severable and if any provision of this chapter or the application of such provision to any person or circumstance is declared invalid for any reason, such declaration shall not affect the validity of remaining portions of this chapter.

Licensure Application Process

Idaho law requires the licensure of all persons who practice or offer to practice occupational therapy in the State of Idaho unless otherwise exempt per Idaho Code 54-3704. Licensure is available through both endorsement and examination.

Each applicant for licensure shall submit a completed written application to the board, on forms prescribed by the board together with the application fee and:

- A certificate of graduation from an approved occupational therapy curriculum or an approved occupational therapy assistants curriculum
and/or

- Passage of the national board for certification in occupational therapy's written exam

Each applicant for endorsement shall submit a completed written application to the board, on forms prescribed by the board together with the application fee and:

- Verification of licensure sent directly from each state the applicant holds a license in

and

- Certification by the National Board of Certification in Occupational Therapy

Idaho does not have reciprocity with any state.

A limited permit may be granted to a graduate occupational therapist or a graduate occupational therapy assistant who has completed the education and experience requirements of this chapter for an occupational therapist or an occupational therapy assistant. The permit shall allow a person to practice occupational therapy under supervision and shall be valid until the person is either issued a license by the Board, or denied licensure by the board. The board may renew a limited permit once.

A temporary license may be issued to an applicant who is currently licensed and in good standing to practice in another jurisdiction and meets the requirements for licensure by endorsement of the other jurisdiction while the application is being processed by the board.

The application form is currently under development. Once the form is approved by the Board, you will be able to download the applications for Occupational Therapy Licensure here, or request an application by writing:

Occupational Therapy Licensure Board of Idaho
Bureau of Occupational Licenses
1109 Main St., Suite 220
Boise, ID 83702-5642

Please include your name, address, & daytime phone number with your request.
APPENDIX C

ACADEMIC DISHONESTY
ACADEMIC DISHONESTY

Academic integrity is expected of all individuals in academia. Behavior beyond reproach must be the norm. Academic dishonesty in any form is unacceptable.

Academic dishonesty includes, but is not limited to, cheating and plagiarism.

CHEATING is defined as the act of using or attempting to use, in examination(s) or other academic work, material, information, or study aids which are not permitted by the instructor.

Examples of cheating include, but are not limited to:

1. Obtaining, providing or using unauthorized information during an examination, either verbally, or visually, or by notes, books, or other materials.

2. Acquiring, possessing, or providing to others, examinations or other course materials without authorization of the instructor. This is understood to include providing information about an examination in advance of the scheduled administration of that examination.

3. Taking an examination for another person or arranging for someone else to take an examination for you.

4. Submitting for course credit, the same work or substantial portions of the same work more than once.

5. Fabricating information without the permission of the instructor for any report or other academic exercise.

PLAGIARISM

1. Definition: representing another person’s works, ideas, or data of work as one’s own.

2. Plagiarism includes, but is not limited to, the exact duplication of another’s work, and/or the incorporation of a substantial or essential portion thereof.

The guiding principle is that all work submitted in this program must be properly credited to the original source(s) of the information. In written work, direct quotations, statements which are paraphrases, summarizations of the work of another or other information which is not considered common knowledge must be cited or
acknowledged and properly referenced.

Quotation marks or a proper form of identification shall be used to indicate direct quotations.

Sources of information must be properly referenced according to APA Style Manual. Inappropriate or lack of acknowledgment/referencing may affect the student’s grade. In **all** instances where students make use of another author’s writings, students must properly acknowledge the source(s). Although individual course requirements may vary, generally speaking, acceptable references do

NOT include course lecture notes, textbooks or course syllabi. Or, if they are used, they should comprise a minor portion of the entire references listed.

3. Ethical considerations and expectations of graduate level works: Copying information from one source onto a student’s paper is a lower level skill. This is true even if a few words are changed, or phrases are rearranged, and/or proper reference is given.

At the graduate level, students are expected to obtain information mainly from primary sources, assimilate that information, and integrate the information into their paper **in their own words**. Thus, while some quotations and paraphrasing are expected, the majority (>75%) of the referenced material will be presented in the student’s own words and writing style. Failure to demonstrate this level of skill may result in a paper not being accepted and/or a penalty in the grade assigned.

**GENERAL GUIDELINES IN SUSPECTED INCIDENTS OF ACADEMIC DISHONESTY**

1. Instructor of the course is responsible for initiating investigation of each suspected incident of academic dishonesty. Each incident for which sanctions are to be imposed is to be reported, in writing, to the chairperson (or designee) of both the student’s major, and the faculty member’s department. A written copy of the incident will be prepared by the faculty member, and sent to the department chairpersons (or designee), and the student. In addition a copy is to be placed in the student’s permanent file in the department and/or college in which the student is a major. The permanent file is to be maintained in accordance with the Family Educational Rights and Privacy Act (i.e., Buckley Amendment).

2. The severity of the offense shall be determined by the circumstances and the nature of the dishonest act. Any sanction applied shall be in proportion to the severity of the offense.
3. The instructor shall obtain appropriate consultation from Chairperson of the Department of Physical and Occupational Therapy (or Dean, College of Health professions, if the instructor is the Chairperson).

4. Every effort should be made to resolve questions of academic dishonesty as expeditiously as possible.

5. Students have the right to appeal processes as outlined in this document and the Graduate School Bulletin.

Penalties for Academic Dishonesty

The following is a listing of the penalties which may be imposed for academic dishonesty. Each penalty is separate. In no way is it intended that these penalties be imposed in a sequential order. Combinations of penalties may be imposed, however. Any penalty imposed shall be in proportion to the severity of the offense.

A. Penalties within a course

   A.1 Warning - The faculty member indicates to the student that further academic dishonesty will result in other sanctions being imposed.

   A.2 Re-submission of work - The faculty member may require that the endeavor in question be rewritten in conformance with proper academic standards and requirements or that a new project be developed. The instructor may specify additional requirements.

   A.3 Grade reduction - The student’s grade may be lowered or a grade of an F, may be assigned for a test, project, or other academic endeavor.

   A.4 Failing - A grade of an F, is assigned for the course.

   A.5 Failing with notation.

       Records of any act of academic dishonesty will be placed in the student’s permanent file. This information may be made available to prospective employers or other educational institutions. Thus, any student committing an act of academic dishonesty may be jeopardizing his or her future educational or employment opportunities.

Penalties at the University level
A.1 Suspension from the University - A Suspension for Academic Dishonesty, is defined as administrative withdrawal of the offending student from the institution for reasons of academic dishonesty. The student is suspended from the entire institution for a length of time to be specified by the university administration. The length of the suspension may vary, depending upon the circumstances contributing to the imposition of this sanction. The suspension will be recorded on the student’s permanent transcript.

A.2 Academic expulsion from the University - Expulsion is the most severe penalty for academic dishonesty and may be imposed for extreme or multiple acts of academic dishonesty. Once expelled, the student will not be eligible for readmission to the University. The academic expulsion will be recorded on the student’s permanent transcript.

B. Restitution of scholarship funds - If the student is a recipient of any ASISU scholarship during the semester in which the dishonesty occurs, and the student is suspended or expelled from the institution, repayment in full of the scholarship amount for that semester will be required. Restitution of funds may also apply to other scholarship or financial aid, at the discretion of the donor.

**PROCEDURES FOR DETERMINATION OF ACADEMIC DISHONESTY AND IMPOSITION OF SANCTIONS**

A. Determination of Academic Dishonesty

The faculty or professional staff member who suspects academic dishonesty shall follow the procedure below:

A.1 The instructor of the course is responsible for initiating investigation of any incident of academic dishonesty. Any student wishing to report an incident of academic dishonesty should notify the instructor of the course in which the incident occurred.

A.2 The faculty or professional staff member who suspects academic dishonesty shall notify the individual involved of the faculty member’s suspicions, receive and consider the student’s response, and collect any available evidence and testimony from any witnesses. In cases of suspected plagiarism, the student may be asked to supply the reference(s) used. The student must comply with any such request.
If the instructor concludes that academic dishonesty has occurred, and that further action is warranted, the incident is to be reported in writing to the chair of the department (or dean of the college, or designee) in which the course is taught and also to the chair of the department (or dean of the college, or designee) in which the student is a major. The written report should include the student’s name, the date of the incident, a description of the incident, a description of any available evidence, and an indication of any action taken by the faculty member up to that time.

B. Imposition of Sanctions

Any sanction imposed shall be in proportion to the severity of the offense. The instructor shall consider the circumstances and nature of the dishonest act in assessing the severity of the offense and a preliminary determination of the sanction to be imposed shall be made.

B.1 Penalties imposed by the instructor within a course

1.A For penalties of warning, resubmitting work, or grade reduction, the instructor shall proceed by notifying the student of the sanction, and imposing the penalty. The penalty imposed shall be included in the report of academic dishonesty filed with the Chairperson of the Department of Physical and Occupational Therapy. This report is to be placed in the student’s permanent file.

1.B Prior to imposing a failing grade in a course, the instructor shall first engage in consultation with the Chairperson of the Department of Physical and Occupational Therapy (or Dean of the College of Health Related Professions if the instructor is the chairperson). The chair (or dean or designee) should meet jointly with the student and faculty member to review the incident.

If a failing grade in a course is to be imposed, the faculty member will notify the student, record the grade, and immediately notify the registrar in writing of the failing grade. The incident and sanction imposed shall be noted in the report of academic dishonesty which is placed in the student’s permanent file.
Penalties at the University level

1.A The decision to impose the penalties of suspension or expulsion shall be made by an ad hoc committee formed for the purpose of evaluating the incident and determining the penalty to be imposed. This committee shall consist of three members: the Chairperson (or designee) of the Department of Physical and Occupational Therapy, the Associate Dean (or designee) of the College of Health Professions, and the Dean of Student Affairs (or designee). The decision of this committee shall be by a majority vote. A written report of the committee’s proceedings, conclusions, and recommendations shall be submitted to the Vice President for Academic Affairs. The sanction shall be imposed by the Vice President for Academic Affairs, who will notify, in writing, the student, the registrar, the dean (or designee) of the college in which the student is a major. A copy of this notification will be placed in the student’s permanent file.

1.B Suspension - If suspension is to be imposed, the ad hoc committee will specify the length of the period of suspension. The Vice President for Academic Affairs will notify the student, the registrar and the dean (or designee) of the college in which the student was registered. A copy of this notice will be placed in the student’s permanent file.

The Registrar will record A Suspension for Academic Dishonesty, on the student’s permanent transcript. After suspension, if the student wishes to be readmitted, the student’s application must be approved by the Scholarship Requirements committee.

1.C Expulsion - If the student is to be expelled, the Vice President for Academic Affairs will notify the student, dean (or designee) of the college in which the student was registered and the Registrar of the imposition of this sanction.

The Registrar will then record Expulsion for Academic Dishonesty, on the student’s permanent transcript. A copy of the notification will be placed in the student’s permanent file. Once expelled for academic dishonesty, the student is not eligible for readmission to the university under any circumstances.
1.D Notification of Scholarship Donor - In each instance of academic suspension or expulsion, the Associate Dean of Students for Scholarship shall be consulted to determine whether the student is currently receiving scholarship for the semester in which the academic dishonesty occurs, the Associate Dean of students for Scholarship will notify the authority responsible for administering the scholarship, award, or financial aid. The Associate Dean of Students for Scholarship will inform the student in writing of the amount of the scholarship, award, or financial aid to be returned. Scholarship donors may decide the amount of restitution, if any, and the method of instituting the restitution.

Students Rights

The student has the right of procedural fairness and appellate processes in all situation involving academic dishonesty. Any student suspected of academic dishonesty will be notified in writing by the suspecting instructor. The student will also be notified in writing as to the findings of any investigation of academic dishonesty and the penalty, if any, to be imposed. Decisions, except that of the Scholastic Appeals Board and those resulting in suspension or expulsion may be appealed by the student.

PROCEDURE FOR STUDENT APPEALS

C. Efforts shall be made to resolve any question(s) of suspected academic dishonesty at the earliest possible stage of the appeals process.

D. The route of appeals is as follows:
   D.1 Faculty member - The student should first attempt to resolve any disagreement with the instructor of the course in which the allegation of academic dishonesty occurred.

   D.2 If a mutually agreeable settlement cannot be reached, the student should proceed to the chairperson (or designee) of the Department of Physical and Occupational Therapy.

   D.3 If a settlement still cannot be reached, the student should proceed to the Dean (or designee) of the College of Health Professions. The dean of the college (or designee) is the final level of appeal for penalties of warning, re-submission of work, or grade reduction within a course.
D.4 If the student wished to appeal further, except as designated above, the next level of appeal is the Scholastic Appeals Board. Only appeals affecting the student’s final grade will be heard by the Scholastic Appeals Board.

E. Any appeal by the student must be filed with the appropriate next higher authority within five (5) calendar days of the date of receipt of notification that academic dishonesty has occurred, or that a previous appeal was denied.

F. The existing policies and procedures of the Scholastic Appeals Board will be followed in the conduct of an appeal based upon academic dishonesty.
APPENDIX D

GENERIC ABILITIES
## Section 1: Commitment to Learning

| Beginning Level Behavioral Criteria (By the end of your 1st year) | Developing Level Behavioral Criteria (By the end of your 2nd year) | Emerging Level Behavioral Criteria (By completion of FW III) | Entry Level Behavioral Criteria (By the end of your 3rd year) |
|-----------------------------------------------------------------|==================================================================|==================================================================|==================================================================|
| Identifies problems; formulates appropriate questions; identifies and locates appropriate resources; demonstrates a positive attitude (motivation) toward learning; offers own thoughts and ideas; identifies need for further information | Prioritizes information needs; analyzes and subdivides large questions into components; seeks out professional literature; sets personal and professional goals; identifies own learning needs based on previous experiences; plans and presents an in-service, or research or case studies; welcomes and/or seeks new learning opportunities | **Occasionally** applies new information and re-evaluates performance; accepts that there may be more than one answer to a problem; recognizes the need to and is able to verify solutions to problems; reads articles critically and understands the limits of application to professional practice; researches and studies areas where knowledge base is lacking | **Routinely** applies new information and re-evaluates performance; accepts that there may be more than one answer to a problem; recognizes the need to and is able to verify solutions to problems; reads articles critically and understands the limits of application to professional practice; researches and studies areas where knowledge base is lacking |

Rationale: (State as succinctly as possible your reasons for making this appeal. You may use the back of this sheet and/or additional pages if necessary.)
APPENDIX F

REMEDIAL COURSEWORK POLICY
**REMEDIAL COURSE WORK POLICY**

Routine opportunities for remedial work are to be stated explicitly in the course syllabus. Availability of routine remediation is at the discretion of the major instructor or course coordinator. Examples would include:

- Making the laboratory available for unscheduled practice
- Being available for unscheduled laboratory practice or consultation (similar to having office hours)
- Making re-examinations available (written or practical)

Students may request remedial work in a course at any time during the course.

- Students are encouraged to seek remedial assistance as soon as any difficulties with course material are identified.

Provision of remedial instruction of any type other than that stated explicitly in the course syllabus is at the discretion of the individual instructor at the time the request is made.

- Faculty may provide any remedial assistance which they feel is appropriate under the circumstances pertaining to each individual student.
- Faculty may, but are not required to, provide remedial assistance under the following circumstances:
  - There is limited time available prior to the next relevant examination or the end of the course.
  - Remediation is requested after a significant delay in notifying the student of unacceptable performance.
  - Any other circumstances exist which would severely limit opportunities for remedial work.
- Remediation is an option when course material has been attempted and performed at a level which is unsatisfactory to either the instructor or the student.
- A grade of Incomplete is an option when course material has not been attempted, or performance has not been evaluated or documented, for good cause.
- A grade of Incomplete is not an option under circumstances when remediation is either being sought or required.

**ACADEMIC PROBATION POLICY**

A student will be placed on academic probation for a period to last no longer than one semester or summer session if his/her cumulative grade point average in graduate level courses in the entry-level occupational therapy curriculum falls below 3.0 or he or she has received a “B-” or lower letter grade in any course. If at the end of the next semester or summer session the cumulative grade point average is still less than 3.0 the student will be dismissed from the program.
APPENDIX G

ADA INFORMATION
The Americans with Disabilities Act (ADA) is the civil rights guarantee for persons with disabilities in the United States. It provides protection from discrimination for individuals on the basis of disability. The ADA extends civil rights protection for people with disabilities in matters which include transportation, public accommodations, accessibility, services provided by state and local government, telecommunication relay services, and employment in the private sector.

Idaho State University, in the spirit and letter of the law, will make every effort to make reasonable accommodations, according to Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act. ISU will not discriminate in the recruitment, admission, or treatment of students or employees with disabilities. Students who believe they qualify for services under the Act should contact ISU Disability Services:
Phone: (208) 282-3599
Fax: (208) 282-4617
Email ada@isu.edu
Rendezvous Complex, Room 125

Stop 8121
Pocatello, ID 83209-8121
APPENDIX H

SEXUAL HARASSMENT STATEMENT
Part 6. Student Affairs

Section IV. Classroom

J. Sexual Harassment

The sexual harassment of any student is absolutely forbidden. Sexual harassment of a student is defined as the use of an employee’s authority to emphasize the sexuality or sexual identity of a student in a manner which prevents or impairs that student’s full employment of educational benefits, climate, or opportunities. It includes faculty behavior that covertly or overtly uses the power inherent in the status of a professor to affect negatively a student’s educational experience or career opportunities on the basis of sexual identity and/or to threaten, coerce, or intimidate a student to accept sexual advances or risk reprisal in terms of a grade, a recommendation, a professional growth opportunity, or a job.

The University has designated the Center for Health and Counseling Services, the Dean of the Student Affairs Office and the Affirmative Action Office for receiving complaints of sexual harassment. The investigation of these complaints will be handled by the Affirmative Action Officer, or in his/her absence, an appointed hearing officer designated by the Affirmative Action Grievance Committee.

The sexual harassment prohibitions and grievance procedures may be found in their entirety in the Idaho State University Affirmative Action Program Policy Statement (Appendix A).
APPENDIX I

SEXUAL ORIENTATION STATEMENT
Part 4. Personnel Policies

Section I. General Personnel Policies

P. Sexual Orientation Policy

(Rev. 4-95)

Idaho State University strives to maintain a campus environment where all decisions affecting an individual's education, employment, or access to programs, facilities or services are based on bona fide occupational or educational criteria such as merit or performance. Irrelevant factors or personal characteristics that have no connection with such bona fide criteria have no place in the University's decision making. Accordingly, to the extent that it does not conflict with a contractual obligation or state, federal or local law or regulation, it is the policy of Idaho State University that an individual's sexual orientation* is an irrelevant factor and shall not be a basis for institutional decisions relating to education, employment, or access to programs, facilities or services.

This policy is not intended to nor shall in any way be interpreted to infringe upon rights guaranteed by state and federal law.

*Defined as heterosexuality, homosexuality and bisexuality.
APPENDIX J

MISCELLANEOUS INFORMATION
Miscellaneous Information

1. Copies and transparencies are made for you by the department secretary when they are needed for:
   Presentations
   Professional projects

   Please don’t ask for exceptions to be made. There are copiers in the basement of Turner, the library, and the student union.

2. There are computers for student use in:
   Room 208 Student Prep room of Garrison Labs 207, 215, 301, 316, and 321
   Turner Hall
   Library
   Business Building- there are several labs for student use. please do not download or save anything to the hard drive.

3. Keys will not be issued to students for access to the labs on weekends or off hours unless permission is granted from Dr. Jim Creelman or Dr. Bryan Gee.

4. There are lockers for student use in Room 303 (women’s locker room) or Room 304 (men’s locker room). Select a locker, and put your name on it. You will need to furnish your own lock.

5. Each student has a mailbox with their name on it. The PT mailboxes are on the third floor. The OT mailboxes are on the 2nd floor outside of Lab 215.

6. Students are allowed building access on the weekends and off- hours with Bengal card and card-readers.

7. Telephones available to students are in labs, and in hallways of the 2nd and 3rd floors. Do not use the telephone in the 2nd floor hallway during clinic hours. THESE TELEPHONES ARE FOR OUTGOING CALLS, NOT INCOMING CALLS.

8. If you have a problem with registration, financial aid, etc., come to the departmental secretaries first and they will help you, or direct you to someone who can help.
APPENDIX K

SOTA BYLAWS
ARTICLE I. NAME
-The name of this organization is the Idaho State University Student Occupational Therapy Association (SOTA).

ARTICLE II. PURPOSE
-The purpose of SOTA is to establish, facilitate, and promote Occupational Therapy interests among the membership and within the community.

ARTICLE III. OBJECTIVES
-The objectives of SOTA shall be:
1. To provide optimum learning opportunities within the scope, field and profession of Occupational Therapy.
2. To provide unity and collaboration among the membership.
3. To provide the members with current developments in research in both Occupational Therapy and Occupational Science.
4. To promote Occupational Therapy in the University and in the community.
5. To encourage Occupational Therapy practice in rural settings.

ARTICLE IV. MEMBERSHIP
Section I: Classes and Qualification of Members.
-The Association’s class of membership shall be composed of all current Idaho State University students with an interest in the objectives and purpose of this Association. The organization will not deny membership to any person on the basis of race, age, religion, sex, disability, color, marital status, national origin, language, or creed.

Section II: Rights and Privileges of Members in good standing.
1. Only members who are currently enrolled in occupational therapy classes have the right to run for positions within the Association.
2. All members have a right to vote for candidates within the association.
3. All members have a right to participate in open discussion with the Association.
4. Each member shall be granted access to the current bylaws of the Association and will be responsible to act in accordance with them concerning the Association.
Section III: Membership Fees.
Membership fees are due before members have rights and privileges as members. Membership fees are due annually two weeks following the first meeting of the school year. Fee amount will be determined by the executive board.

Section IV: Good standing.
In order to be a member in good standing: the member must be currently enrolled in OT classes, pay the appropriate membership fee, and agree to uphold the standards and ethics of SOTA and Occupational Therapy program at ISU.

Section V: Disciplinary Action.
Any member who fails to remain in good standing shall be dropped from the Association and thus losing all rights and privileges of SOTA.

Section VI: Reinstatement.
Any former member that has been dropped from the Association can be reinstated if they return to status within the parameters of good standing.

ARTICLE VII. LIMITATIONS
Limitations are inherent to

ARTICLE VIII. MEETINGS
Section 1: Annual Meetings
1. Mandatory annual meeting of the Association shall be held for the purpose of the conduction of elections for officer’s, appointment of special committees, and as deemed necessary and to conduct any other association business. The annual meeting will be held at the end of the spring semester.
2. The members at the annual meeting of SOTA shall have the power to adopt and amend the Bylaws, with a quorum present.
3. A 15 day notice will be given to all members prior to setting the date for the annual meeting.
4. A quorum shall consist of 2/3 of the membership, including at least (2) of the officers.

Section 2: Meetings other than Annual Meetings
SOTA shall have a monthly meeting scheduled by the President in consensus with SOTA members, excluding affiliation fieldwork dates.

Section 3: Special Meetings
Special meetings may be called by the officers, provided that (2) days notice is give to all members.
ARTICLE IX. EXECUTIVE OFFICERS

Section 1: Positions
• The outgoing executive officers will determine positions to be elected at the annual meeting with input from club members. The Advisor will also be introduced at this time.
*The Secretary position will be elected in the Fall Semester.

Section 2: Qualifications
1. Students who are SOTA members in good standing may serve.
2. Who have consented to fulfill the duties and responsibilities of stated position.
3. The offices of President and Treasurer will be held by 2nd year student members.
4. The offices of Vice President and Secretary will be open to any student members.

Section 3: Terms of Vacancies
1. Officers shall assume office at the close of the annual meeting or the close of an election meeting.
2. The term of office shall be one year.
3. No officer shall serve more than two complete consecutive terms in the same office.
4. In the event that a position of the executive board becomes vacant, the vacancy shall be filled by a 2/3 vote of the membership.

Section 4: Officer Responsibilities
• It is the duty of each officer to become familiar with the SOTA bylaws.
• It is the responsibility of each officer to understand fully their scope of duty and role within SOTA.
• Incoming officers are required to attend the ASISU training meeting.
• It is the responsibility of the outgoing officer to orient the incoming officer of the requirements/ logistics of the position as deemed sufficient by both parties.
• Supplemental and emergency funding requests will be submitted by the executive board and approved by the club’s simple majority vote prior to going to ASISU.
• Faculty funding requests will be submitted by the executive board and approved by the club’s simple majority vote prior to submission.

1. President:
The President shall be responsible for preparing agendas for all Association meetings. The President shall preside at all Association meetings and is responsible for the Association’s annual report to the Idaho State University Student Occupational Therapy Association. The president may also appoint special committees as the need arises.

2. Vice President:
The Vice President shall assume the duties of the President at the request of the President or in the absence or incapacitation of the President. The VP will obtain club
points from the individual members and turn them in to ASISU. The VP will oversee all special committees.

3. Secretary:
The Secretary shall oversee the election process and be responsible for keeping the minutes of all association meetings. The Secretary shall notify Association members of the date, time and place of association meetings via flyer and/or email (5) days prior to the monthly meeting (15) days for the annual meeting). The Secretary is responsible for maintaining the Association correspondence including notification of the annual meeting and making Association Bylaws available to the membership. The secretary will also provide a copy of the monthly meeting minutes (paper or email) to each club member and the advisor within 2 weeks following the meeting. At the annual meeting a copy of all minutes shall be archived.

4. Treasurer:
The treasurer shall be responsible for reporting, in writing, the financial status of the Association to the membership at the annual meeting. The treasurer shall also report the financial status to the association at the monthly meetings. The Treasurer is responsible to keep the financial record current. The Treasurer is responsible to give all account information and records to the incoming treasurer. At the annual meeting a copy of the treasures reports shall be archived.

5. Advisor:
The advisor must be a faculty/staff member in the Idaho State University Occupational Therapy Department. The advisor shall serve as an ex office member of the Executive Officers and shall perform other such duties as the membership may determine. The advisor will also act in the best interests of SOTA by determining money requests (equaling and surpassing) the amount of $100 made by any member and/or the membership. The advisor will be appointed on a volunteer basis.

**Section 5: Duties**

-The Executive Officers shall, in addition to the duties otherwise imposed by these Bylaws and Association policies:
1. Carry out the mandates and policies of the Association as determined by the Membership.
2. Direct all business and financial affairs for and on behalf of the Association following approval by a simple majority vote.
3. Foster the growth and development of the Association.
4. Direct and determine the priority of all activities and expenditures in fulfillment of the Association’s Purpose and Objectives.
5. Be responsible for creation, appointment, purposes, and activities as it deems necessary.
6. Review and revise Association policies for consistency and language with such new policies as may be adopted.

**Section 6: Conduction of Business**

1. Written notice (flyers and/or email) of Annual meeting shall be granted to all members not later than (10) days before the date fixed for the meeting.
2. Written notice (flyers and/or email) of monthly meetings will be granted to all members not later than (5) days before the date fixed for the meeting.

**ARTICLE X: ELECTIONS**

- Officers, (Delegates, and Nominating Committee members, if necessary) shall be elected by a majority vote.
  The President, Vice President, Secretary, and Treasurer, shall be elected annually. All election results shall be given to the membership.
- The ASD Delegate will be voted on by a simple majority.

**ARTICLE XI: FINANCES**

**Section 1: Limitation of Expenditures**

- No officer or Association member shall spend any money not approved by the membership or (simple majority) vote of the executive officers. In order to request and receive money from the Association, the member and/or Officer must be active. This includes:
  1. Attending at least 75% of the monthly meetings AND
  2. Participating in 2 Association activities per semester (fundraisers, promotions, planning for guest speakers, etc.)
- SOTA will at no time be held responsible for any moneys spent without the prior approval (simple majority) of the members or (simple majority) vote of the executive.
- In addition to the above requirements, any moneys (equaling and surpassing) $100 must be approved and cleared through the acting advisor.

**Section 2: Funding of Conferences**

- Any request for funding of conference expenses must be provided in writing to the executive board at least 2 weeks prior to the IOTA Conference and by the end of the fall semester for the AOTA National Conference.
  Other conferences expense request deadlines will be evaluated on a case-by-case basis.
- The ASD Delegate will be given priority for funding as a representative of ISU SOTA.
- Funding stipulations will be determined by the executive board.
Section 3: Prudent Reserve
-A reserve of $100 will be maintained in the SOTA account only to be used with a 2/3 majority approval vote by the club. Any use of the prudent reserve funds must also be approved by the SOTA advisor.

ARTICLE XII: AMENDMENTS
-These Bylaws may be amended by a 2/3 vote of the membership at any meeting of the Association, provided that at least (15) days prior to that meeting a copy of the proposed amendments have been submitted to the Association members.

ARTICLE XIII: SPECIAL COMMITTEES
Special committee’s duties and purpose:
1. Special Committees will be responsible to the SOTA club and be held accountable by the governing SOTA bylaws.
2. In order to keep the SOTA members informed Special Committees will be asked to make informal reports at monthly SOTA meetings.
3. Special committees will be overseen by the vice president.
4. Any supplies or moneys spent by the Special Committee must be approved by a simple majority of the members.
5. SOTA will at no time be held responsible for money expenditure without the prior approval (simple majority) of the members or the approval (simple majority) of the executive members.

ARTICLE XIV: ASISU
-SOTA will comply with ASISU Constitution and Bylaws.
Appendix L
OT Program Conference Awards
Occupational Therapy Professional Development Awards

The Occupational Therapy (OT) program offers a number of awards throughout a student’s program of study. These awards acknowledge outstanding performance as well as support professional development. Professional development awards include: the Idaho Occupational Therapy Association Conference Award, the American Occupational Therapy Association Student Enclave Award, and the American Occupational Therapy Association Annual Conference Award.

To apply for an award a student must first meet the eligibility criteria for the respective award. Students must then submit a one page Letter of Application to the Director of Occupational Therapy that addresses three key areas: a) How the award will benefit the applicant’s educational process, b) How the award will enhance the student’s preparation for clinical practice, and c) How the award will benefit peer ISU OT program students; an explanation of how the student will disseminate knowledge gained from conference attendance to her/his peers is required. In accepting an OT program award the student must agree to disseminate her/his knowledge gained from their experiences to class peers within seven calendar days of returning to ISU. Students that do not attend the conference for which they had won an award will not be eligible for other OT program conference awards. Faculty reserve the right to amend program rules.

Eligibility Criteria:

Idaho Occupational Therapy Association Annual Conference Award
Two $300 Idaho Occupational Therapy Association Annual Conference Awards are offered each fall; one for a second year student and one for a third year student. Only second and third year MOT students may apply for the IOTA Annual Conference Award. A student receiving an IOTA Annual Conference award in their second year of the MOT program is not eligible to apply for this award their third year. Applicants must be members of IOTA (proof of membership must be submitted with the application) and preference will be given to persons either speaking or presenting a poster. Preference will also go to persons who have not received OT program support to attend an AOTA Annual Conference. The IOTA Student Representative is also eligible for this award, though an application is required for consideration. Applications to the OT program Director are due the second Friday in September.

American Occupational Therapy Association Student Conclave Award
One $900 American Occupational Therapy Association Student Conclave Award is offered each fall. Only third year MOT students may apply for the AOTA Student Conclave Award. Students having received an AOTA award are not eligible to apply for
this award. Applicants must be members of AOTA (proof of membership must be submitted with the application) and preference will be given to those students who have not received an IOTA award. Applications to the OT program Director are due the second Friday in September.

**American Occupational Therapy Association Annual Conference Award**

Two $1000 American Occupational Therapy Association Annual Conference Awards are offered each spring; one for a first year student and one for a second year student; BUS Seniors in good academic standing are considered to be first year MOT students. However, third year students who may have research being presented at the conference in question may apply. A student receiving an AOTA Annual Conference Award in their first year of the MOT program is not eligible to apply for this award their second year. Preference will be given to those students who have not received an IOTA award and are members of AOTA (proof of membership must be submitted with the application). A person attending the AOTA Annual Conference as the ISU Student Representative is required to submit a Letter of Application to the OT program director to be considered for this $1000 award. Applications to the OT program Director are due the third Friday in January.
Appendix M
OT Scholarship Awards
Occupational Therapy Program Scholarship Awards

Occupational Therapy Academic Merit Scholarships: For each first year MOT class two persons are awarded a $1,500 Academic Merit Scholarship. These persons must have demonstrated outstanding records in their undergraduate GPA and the Graduate Records Examination or Miller Analogies Test. This scholarship is awarded to students during the first semester of the second year in the Occupational Therapy Program.

The Arthur “AJ” P. Lloyd, Jr. Endowment Scholarship Fund: The family of AJ Lloyd Jr. established the Arthur “AJ” P. Lloyd, Jr. Endowment Scholarship Fund in memory of their son, who passed away February 2004. AJ was a 2001 graduate of the ISU Occupational Therapy program. The scholarship is awarded annually to an OT student who is completing their first year of the Occupational Therapy program.

The Arthur “AJ” P. Lloyd, Jr. Outstanding Achievement Award: The Arthur “AJ” P. Lloyd, Jr. Outstanding Achievement Award is given to a third year Occupational Therapy student who has earned the highest grade point average through their course of study within the program.

Idaho Occupational Therapy Association Outstanding Student Award: The Idaho Occupational Therapy Association Outstanding Student Award is funded by the Idaho Occupational Therapy Association to recognize the Occupational Therapy program student who has demonstrated excellence in the clinical setting. The recipient of this award has demonstrated proficient clinical skills including therapeutic use of self, client-centered care and effective communication skills with his/her clinical supervisor and department faculty.

Occupational Therapy Outstanding Research Award: This award is given to the Occupational Therapy program student(s) who has complete a project that has the potential to substantially contribute to the body of knowledge in occupational therapy or to the growth and development of occupational therapy’s presence on ISU campus and in the community at large.

Outstanding Fieldwork Educator Award: This award is given to the occupational therapy fieldwork instructor for their exemplary teaching and clinical skills; and for going above and beyond the status quo in the clinical education of ISU OT students. As a program we are grateful for all of the extra time and energy that they have shared on behalf of our students. Their contributions to our program and the occupational therapy profession are invaluable.
