Modern Language Association (MLA)
The Modern Language Association (MLA) style guidelines presented here have been adapted from the 2016 MLA Handbook for Writers of Research Papers, 8th edition. MLA style is often used in the humanities. In an MLA-style paper, the writer identifies the author and page of each source in parentheses after every reference. That information then directs the reader to more detailed entries on a Works Cited list at the end of the paper.

In-text Citation
Doris Graber suggests that “media are most influential in areas in which the audience knows least” (210).

- Both direct quotations and paraphrases need a page number, but no “p.” abbreviation precedes it (54).

Alice Park reports that “the U.S. currently enjoys the highest immunization rate ever.”

- Discussion of citing sources without page numbers is on p. 56, which says “do not count unnumbered paragraphs.” Indicating a section, if possible, is appropriate.

Works Cited

- Most title words are capitalized; book titles are italicized (26).
- Place of publication no longer required.

- Basic entry for an online magazine article is on p. 48
- Most title words are capitalized; magazine titles are italicized and article titles are in quotation marks (48).
- URL or DOI usually required; access date usually not required (p. 48; see also p. 53).
- Don’t include the http:// beginning of a url; do include www. if your url has one (110), which the article in the example happens not to.

American Psychological Association (APA)
The American Psychological Association style guidelines presented here have been adapted from the 2009 APA Manual of Style, 6th edition, second printing. APA style is widely used in the social sciences. In an APA-style paper, the writer identifies the author and year of each source in parentheses after every reference. That information then directs the reader to more detailed entries on a Reference List at the end of the paper.
**In-text Citation**

Graber (2002) suggests that “media are most influential in areas in which the audience knows least” (p. 210).

- Direct quotations need “p.” or “pp.” and page number (171).

Park (2008) reported “the U.S. currently enjoys the highest immunization rate ever” (para. 2).

- Discussion of citing online source without pages is on p. 172.
- Other people’s works are ordinarily presented in the past tense (78).

**References**

- Only first words and proper nouns are capitalized in a book title in a reference list (journal titles are different). Book titles are italicized. Other rules apply to titles appearing in the body of a paper: see p. 101.
- No periods with abbreviations of “state” names, including DC (p. 88).

- Basic entry for an online magazine article is #8 on p. 200. In this case, though, *Time* does not offer volume and issue numbers.
- Only first words and proper nouns are capitalized in an article title in a reference list—journal titles are different. Article titles are not italicized or placed in quotations. Different rules apply to titles appearing in the body of a paper (p. 101).
- URL or DOI required; access date usually not required. No period after url (p. 192).

### Chicago

The guidelines presented here have been adapted from the 2017 *Chicago Manual of Style*, 17th edition. Chicago style is used in some of the humanities and social sciences and is often used outside the university. In it, the writer directs the reader to entries in a bibliography or reference list by using one of two basic forms of documentation: notes and author/date. This handout describes the note system, which has been widely used for many decades.

**In-text Citation**

Doris Graber suggests that “media are most influential in areas in which the audience knows least.” ¹

Alice Park reports that “the U.S. currently enjoys the highest immunization rate ever.” ²

- Superscript numeral sends reader to citation in footnote or endnote—author’s choice (751).
Notes

   - Only the first line of a note is indented; author's first and last names are not reversed (753).
   - Elements of notes are separated by commas (753).
   - A book's publication information is placed in parentheses (753).
   - No periods with abbreviations of “state” names, including DC (573).

   - Elements of notes are separated by commas (753).
   - Access dates may be required for students and appear before the URL or DOI (748 and 859).
   - URL or DOI required as well as facts of publication (745).
   - Dates of journal articles are placed in parentheses (830), but dates of magazine articles are not (837).
   - Citing a source without page numbers does not require counting unnumbered paragraphs but should refer to section or chapter headings in longer unpaginated works (752).

Bibliography

   - Sources are alphabetized in hanging indent form (782).
   - Elements of bibliographic entries are separated by periods (782).
   - Most title words are capitalized; book and journal titles are italicized (791).
   - Website titles are italicized only if they also have a print version: the *Idaho State Journal* website is italicized but Wikipedia and Facebook are not. (845)
   - No periods with abbreviations of “state” names, including DC (573).

   - Basic entry for an online magazine article is on p. 838. There is no model for an online magazine article with access dates, so this example is compiled from models on pp. 734 and 834.
   - Most title words are capitalized; magazine titles are italicized and article titles are in quotation marks (738).
   - If you have to break a URL, do so before a single slash or similar punctuation (750).
   - URL or DOI and access date may be required of students (748).
   - URL or DOI ends with period.
