Career and Technical Education Advanced Opportunities provide high school students with the technical skills, knowledge, and attitudes necessary to prepare for high skill, high wage, and high demand occupations in current or emerging professions. Two options exist for high school students interested in professional-technical courses: Dual Technical Credit and Technical Competency Credit.

**DUAL TECHNICAL CREDIT**
High school students simultaneously earn credit toward a high school diploma and a postsecondary degree or certificate. Dual Technical Credit is awarded for the successful completion of a course. The cost is $65 per credit and fees are paid at the time of registration. Eligible to use Fast Forward funding.

**TECHNICAL COMPETENCY CREDIT**
High school students document proficiency in skills and competencies in an approved high school professional-technical program. Competencies are evaluated for postsecondary transcription at a later date (up to two years). The cost is $10 per credit. Not eligible to use Fast Forward funding.

**PROGRAM OPTIONS**
- Auto Collision Repair and Refinishing
- Automotive Technology
- Business Technology
- Computer Aided Design Drafting Technology
- Computerized Machining Technology
- Diesel/On-Site Power Generation Technology
- Early Childhood Care and Education
- Energy Systems Engineering Technology
- Health Occupations
- Information Technology Systems
- Robotics and Communication Systems
- Welding
